

Which one would you prefer?

Recently Qualified Chemist, Midlands

A small yet strategically minded practice in the Midlands requires a recently qualified attorney to help manage their current work load, as well as adding to their portfolio with additional clients across the chemical and pharmaceutical fields. Individually tailored support and training is offered to fee earners at all levels, and the career prospects and earning potential is excellent.

1-2 Years' PQE, Chemist, London

Work with an eclectic portfolio with a largely European focus. You will be expected to work hard at this firm, but you will be rewarded accordingly with a generous remuneration and accelerated career progression. Duties can vary depending on the day, but you can expect a healthy mix of drafting and prosecution, complex IP strategy, oppositions and appeals, and some SPC work.

Finalist – 3 Years' PQE, Physics, Midlands

Enjoy an extremely broad client base and handle innovative technologies originating from a range of fields, including mechanical, electronics and medical devices. The firm adopts a modern approach and has witnessed steady growth over recent years, with attorneys joining from a variety of backgrounds and areas of expertise.

Newly Qualified Patent Attorney, Mechanical Engineering, South West

This firm has a refreshing take on the traditional IP business model and is not afraid to adapt their working practices to suit changes over time. They are growing their outfit in the South West to help manage work from two major international clients, but there will also be opportunity to work with smaller independents and SMEs.

Part Qualified Patent Attorney, Electronics, London

Currently training but don't feel the fit is quite right with your current firm? There's no need to stick it out until after qualification! This firm has a track record of welcoming attorneys at an early stage in their careers and encouraging them to thrive in their supportive, family friendly environment.

2 Years' PQE+, Electronics, North

Working in the regions doesn't necessarily mean you'll lose out on the top clients or earning potential. What it does mean is the opportunity to work with interesting local talent, a fantastic work life balance, and less obstacles when it comes to moving up the career ladder.

2-4 Years' Experience, Electronics, Cambridge

You will have the best of both worlds at this firm, with world class clients, market leading remuneration and a beautiful setting just a stone's throw from the capital. The firm has cross office teams allowing you to collaborate with colleagues across the UK on a range of interesting client projects, and plenty of flexibility when it comes to home/remote working.

Qualified Patent Attorney, Electronics, London

Looking for something 'a bit different'? We can honestly say that this firm is very much that, and can offer you an interesting change to your everyday private practice. There will be the opportunity to work with professionals from all corners of the IP community and provide a full service to your clients, from initial IP capture to all ongoing protection and managing any developments or objections that may occur.

Associate, Electronics/Engineering, Birmingham

Represent the local community with well established relationships with local academic institutions, universities, entrepreneurs and SMEs. You will be expected to become involved in all areas of IP, including advising on design rights, licensing and litigation; and more commercially focused areas such as working closely with tech transfer companies and spin-outs.

Nearly/Newly Qualified, Electronics, London

There's plenty of opportunities for electronics patent attorneys at the moment so what makes this one so special? Maybe it's the fact the firm will give you the freedom to make the role completely your own, with flexible working, the opportunity to seek out clients to match your interests (no matter how niche), and a variety of Partners and fellow fee earners available to you to draw experience from.

Newly Qualified, Biotechnology, London

Join one of the most highly regarded practices in London and handle an unusual case load with plenty of high value and complex work, including oppositions and appeals for clients in the US and Europe. The firm is visible at many of the leading industry conferences and there will be the opportunity for you to travel to these, as well as meeting with existing and potential clients across the world.

Senior Associate, IT&E, North

Want to help further build a steadily growing practice in the North? This is a fantastic opportunity for someone who may be reaching an impasse in their career and wants a new challenge. You will be responsible for shaping key management decisions, training and supervising the next generation of IP talent, and representing the firm in question at top networking and industry functions.
