

Jobs to di...ode for.

Chemistry, Patent Attorney (Qualified), London
 Qualified Patent Attorney (circa 1-3 years post qualified experience) required to work for this fabulous firm with a culture that is unconventional, inclusive and allows attorneys to develop at their own pace whilst challenging them with varied and interesting work. Ideally, you will have a technical background in organic chemistry with perhaps a little biotechnology knowledge, be capable of working autonomously and looking for something just a little different from the traditional.

Electronics, Patent Attorney (Qualified), South West
 A fantastic opportunity to move to the South West and maintain a London level of earning (or achieve the same moving from another local firm). This practice's operation has been expanding in recent years and they require more Associates with aspirations of significant career advancement to help the office progress and grow. You will enjoy an excellent mix of clients and responsibilities, many large corporations with plenty of drafting but also some contentious work.

Engineer - Mechanical/General (Qualified), Yorkshire
 Tired of traditional? A firm with a fiercely modern environment and solid reputation is in need of an attorney to take the reins for a particularly prestigious and respected client. As well as this impressive responsibility you will have the opportunity to diversify and pursue your own areas of interest. Welcome the progressive culture and see your career really take direction, with the help of your own input and ideas.

Boutique Private Practice in need of Finalist/Newly Qualified, Electronics, Yorkshire
 Not many finalist level attorneys have the opportunity to have a real say in the future of their firm. This role is different. The firm in question has left its adolescence and has gone from strength to strength with clients on par with the best in the industry. Manage your client's journey from initial advisory stages and invention harvesting through to on-going commercial strategy. Pencil pushers need not apply, this role requires someone ready to put a stake in the ground and make a difference.

Chemistry, Patent Attorney (Finalist/Newly Qualified), Midlands
 A fantastic position has arisen for a finalist or newly qualified patent attorney with this modern firm. There has been significant expansion across the firm's multiple locations of late, warranting the need for a new starter that is able to directly deliver impeccable service tailored to their client's specific needs. The firm boasts a down to earth atmosphere, a comprehensive remuneration package and a genuine understanding of work-life balance without compromising on the quality of their clients.

Engineering Patent Attorney, Scotland
 Qualified Patent Attorney with a mechanical engineering background required for this highly entrepreneurial firm based in Scotland. Enjoy tremendous freedom and scope to build your own portfolio whilst benefiting from a varied and interesting range of clients most of whom are direct. The firm is investing heavily in Scotland and recruiting this position is key to its strategy. Therefore, in a highly visible role, career opportunities should be substantial.

Australian? South African? New Zealander? American? Canadian? European?
 We have extensive experience and plenty of success placing attorneys not from the UK with UK firms. We are particularly interested at the moment in overseas qualified patent attorneys with a technical background in electronics and/or mechanical engineering. Also, if you are a Brit wishing to move to another country we can help with that too.

Automotive/Electronics/Physics Patent Attorney (Newly Qualified), London
 A hugely varied role for a Patent Attorney with a physics, electronics or mechanical (with electronics) background. The firm deals with a high volume of European oppositions work and would suit someone lacking experience at the EPO who hopes to address this or an attorney with experience hoping to build on the knowledge they have gained so far. The role will allow a great deal of scope to forge your own career, the firm does not micro manage its attorneys. Clients include many large international corporations much of which is direct and contentious work. There will also be a high volume of drafting. This is a truly excellent and exciting opportunity for a major London firm who pay extremely well and ensure that all of the Attorneys build a well-rounded portfolio of skills.

Generalist, Patent Attorney (Qualified), Yorkshire
 The rolling hills of the Peak District offer a fantastic backdrop for a mechanical engineer, or potentially a chemist with mechanical patent drafting experience. Experience is essential, as autonomy is given from the outset, and there is a great deal of exposure to detailed and complex technologies. The firm is relatively small with considerable expansion plans and enjoys a huge variety of work originating from a myriad of company sizes and structures. There is a considerable volume of work so you will be active from day one but will also be given the chance to build your own portfolio as you see fit.

Electronics/Physics Patent Attorney (Finalist), London
 Contentious European work and lots of drafting will form a major part of the day-to-day in this position. You will also enjoy tremendous variety with clients incorporating automotive, telecommunications, micro fluid dynamics, software and a range of other technologies. The firm has a great deal of direct clients and you will be given the freedom to liaise with clients yourself and develop your own style of working. The Partner you will be working with has an excellent profile in the profession internationally and will help you develop a highly rewarding career.

Electronics Patent Attorney, Finalist/Newly Qualified, London
 Work directly with some of the largest software companies in the world and enjoy exposure to the more litigious side of intellectual property as well as drafting and prosecution. Benefit from a ridiculously high salary and a generous bonus scheme. Work with some of the brightest minds on cutting edge technology and enjoy an environment that actively encourages creative thinking and welcomes new ideas. Know where you are heading in a career structure that is well defined and meritocratic.

Electronics/Mobile Telco's (Radio Access Domain), Patent Attorney (Qualified or Part Qualified), London
 For those that want direct clients at the cutting edge of mobile technology this firm is the best place to be. With a client portfolio that would induce bouts of jealousy in most of their competitors, they also offer a salary and bonus scheme that would create the same reaction in your peers. Workload relates to mobile telecommunications particularly radio access domain. If you have experience mapping patents to standards technology, whilst not an essential requirement, it would be highly regarded as there will be work in this very interesting area.

Biotechnology, Patent Attorney (Qualified), London
 Work with some of the world's top ranking biotechnology companies and benefit from a working relationship with a Partner with a superb reputation in the sector. Enjoy exposure to significant opposition (including proceedings before the EPO) and litigation cases, portfolios of high value prosecution and strategic due diligence work. The environment is highly meritocratic and the opportunities for career advancement are myriad.

Chemistry, Patent Attorney (Qualified), London
 Experience the 'wow' factor and join the expanding Life Sciences department of this leading law firm. Be exposed to pedigree clients and help them implement their international IP plans, as well as enjoying a diverse portfolio of technology and being challenged on a daily basis. No two days will be the same in the eclectic and impressive surroundings of this firm, with a lavish remuneration package to match.
