

When I grow up
I'm going to
earn at least
market rate...

I'm going to earn
much less than I'm
worth because I won't
know my market value
(because there are never
salaries on job adverts)

**Biochemist/Organic Chemist, Patent Attorney,
(Up to) £90,000 plus Super Bonus, London**

Qualified Patent Attorney with circa 1-4 years' post qualified experience required for this innovative London private practice. This is a highly commercial role that will allow you to work with a wide mix of direct clients, providing strategic, consultative advice. The role has excellent career progression potential and you could quickly be in a position to help with the expansion of the team in respect to hiring and developing new trainees and being one of the people that is key to shaping the direction of your department.

**Electronics, Part Qualified/Qualified, CPA/EPA (to
£50k PQ or £80k Q), Midlands**

This firm boasts a leading reputation and a bonus structure enviable to most in the industry. There is a need for both part qualified and qualified attorneys to add to their Electronics team and take a share in their exciting client base, including high value and (highly secretive) technologies. There is honest yet achievable career progression and attorneys benefit from the security of being part of a well-structured and successful operation. Business development is encouraged, as well as input and ideas for the future of the firm.

**CPA/EPA (Qualified), Telecommunications/Radio
Access Domain, £70-£80,000, London**

The acquisition of a large direct client has resulted in this modern, yet well established, firm requiring up to four additional attorneys with knowledge of mapping patent to standards technology. You will be essential to the development of this client's portfolio, of which there is already a substantial patent family, and be responsible for the significant opposition work as a result. The firm embrace a meritocratic environment and so there is also the opportunity to grow your own practice and acquire your own work, whilst being generously rewarded in the process.

**Attorney, Qualified, Chemist/Pharmaceuticals,
Salary to £75,000, London**

A recently qualified or finalist level patent attorney is required to work with a broad range of clients predominantly within the pharmaceuticals sector. You will be connecting with global pharmaceutical companies, small-to-medium businesses and technology transfer offices as well as advising companies in the early phases of their development. In addition to drafting and prosecution, there will be a not inconsiderable amount of opposition and appeal work. The firm encourages its attorneys to get involved, and you will be supported to attend networking events and exploit commercial opportunities with support from Partners.

**Engineering (Mechanical), Qualified Patent
Attorney, £75,000+, London**

Mechanical engineers are becoming more in demand of late and this role has a great deal of appeal. You will be in close interaction with an international giant in the Engineering field and will be a major driving force in the development of their future IP plans. Play a part in commercial strategy and planning; advise and act on oppositions and appeals; and delve into an intricate portfolio of ever evolving technologies. The flexibility of the firm will also allow you to target your own clients and build your own practice through networking, client pitches and the development of your own identity as a Patent Attorney.

**Finalist/Qualified EPA/CPA, Mechanical Engineer
(To £55k Finalist and £75k Qual.), Midlands**

A large firm with genuine career opportunities, including international travel and (possible) relocation, are looking for a mechanical engineer to join their Midlands office. The firm enjoys success on a macro scale but the separate departments work as individual entities, benefiting from close knit teams and regular Partner and peer led appraisals and mentoring. The broad mix of work warrants a range of responsibilities and duties; from advising and invention harvesting in the early development stages of a start-up company, through to tackling contentious work and devising commercial strategy for large international conglomerates.

**Chemistry, Patent Attorney (Qualified), £75-£90,000
London**

Act for an incredibly varied direct client portfolio incorporating everything from oil & gas to chemical materials with a potentially high volume of litigious work. The firm is well-known for its oppositions practice and encourages its attorneys to be strategic in their thinking when managing their clients' IP portfolio. This practice has an excellent career structure with opportunities for progression based on being good at what you do, not how you play the politics. As long as you are a qualified Patent Attorney, the firm is very flexible in relation to the number of years' post qualified experience that you have and the associated salary.

**Electronics, Finalist/Newly Qualified CPA/EPA,
£65-£80,000, London**

A London based firm is now recruiting a new attorney to join their highly successful IT & Electronics department. You will have a varied, challenging and interesting client base that includes two global telecommunications companies and a mix of small entrepreneurial businesses, ensuring well-rounded experience and variety in your portfolio. A great deal of the work is from direct clients, requiring a consultative and commercial mind, and as well as drafting and prosecution you will be handling EPO oppositions work (including oral proceedings in Munich) and UK litigation.

**Chemistry, Part Qualified, Patent Attorney (Salary
up to £45,000), Birmingham**

Chemists with 1 - 2 years' experience are needed to further expand the success of this leading firm of Patent and Trade Mark Attorneys. The firm's consistent success allows them to offer a wealth of support and encouragement to trainees and the open environment ensures attorneys will develop a fully rounded and advised skill set through collaboration and exposure to the Partners and peers. The firm offers the full gamut of patent work, including exposure to more contentious and commercially centred duties from early on.

**Ace Role in Yorkshire: Mechanical Engineering,
CPA/EPA, Salary circa £75,000**

This role really offers the best of both worlds. There is the opportunity to work closely with a new leading client constantly at the forefront of innovative engineering technologies; and be encouraged to build your own portfolio ranging from sole inventors to SMEs and R&D. You will be welcomed with a generous remuneration package, a varied workload (the direction of which you can steer to an extent) and a hands-on approach promising client interaction from pretty much day one.

Patent Engineer, Telecommunications, London

One of the largest firms in the UK with a refreshing approach to the market requires a telecommunications specialist to begin their career in IP. There is no need for prior knowledge of the IP profession, although some will be welcomed, and the primary focus will be on your experience of telecommunications (in particular radio access domain). Given the wide range of possible applicants salary is flexible.

**Engineer (Mechanical), Qualified Patent Attorney,
(Up to £80,000), Midlands**

Join a modern meritocracy and enjoy a salary commensurate to that of London with a maverick firm who constantly stays ahead of the curve. They have recently welcomed a new major direct client and can promise plenty of drafting and prosecution, as well as more contentious and litigious work. Networking is healthily encouraged and there will be the opportunity to attend events, both in the UK and overseas.
