

When I grow up I want to be a dinosaur.

Me? I want to draft interesting patents for large corporations and deal with all of their contentious work.

Part Qualified Trade Mark Attorney, London, £35,000+

A steady increase in work for this firm has warranted a need to grow their TM department and offer a fantastic opportunity for a junior attorney looking to benefit from a well-established and structured support scheme. Whilst other firms are perhaps happy to continue as normal, the keen commercial sense and encouragement for business development ensures that this team are constantly adding additional work (and clients) to their portfolio. The exposure to household names and flexibility to work autonomously (with support when needed) will ensure your development into a successful and well-rounded trade mark professional.

Potential Chief; Debonair Operator, Electronics, Yorkshire, £85,000+

A qualified patent attorney with a background in electronics is required to complement this avant-garde firm located in the hub of academic activity in Yorkshire. A commercial mind is vital, as is the ability to recognise areas of IP potential within existing and prospective clients' portfolios. The location encourages interaction with sole inventors and start-ups, supplemented with larger international conglomerates gained through the firm's solid reputation and ranking in the industry. There are no restrictions on career advancement and those who deliver will be rewarded with a generous salary and achievable bonus scheme, as well as (relatively) quick progression up the seniority ladder.

Electronics, Finalist Level with a keen interest in Business Development, Yorkshire, £65,000+

Become a real influence in the future of this forward thinking firm in the heart of the Peak District. Their plan for significant growth is very much in progress and as a result there is a plethora of work ready and waiting for you, as well as the opportunity to build your own practice influenced (to an extent) by your own interests. The client base is varied to say the least with start-ups, academia and larger multinationals offering a range of detailed technologies. There is the chance to stretch your skill set to include advising on invention harvesting and IP strategy and tackling a challenging portfolio of highly contentious and litigious issues.

Inorganic/Organic Chemist, London Part Qualified up to £50,000, Qualified £75-£90,000

Work with SMEs, technology transfer offices and large pharmaceutical companies, as well as being encouraged to act in a consultative capacity and advise start-ups on the benefits and potential of their IP strategy. You will be primarily drafting and prosecuting before the UKIPO and EPO (with the opportunity to interact with foreign agents on international matters) as well as dealing with contentious matters such as oppositions, appeals and issues relating to supplementary protection certificates. Due to the continually growing work load and the solid structure of the department the firm can accommodate either part or fully qualified candidates.

Electronics Patent Attorney, Qualified, London, £80-£90,000

This is a very special role. The firm is expanding rather rapidly so can offer opportunities for development and career advancement that you will not get elsewhere. They focus on getting interesting work from an array of international companies who give direct instructions, so a great deal of your time will be spent on a challenging contentious portfolio. Enjoy a mix of clients and technologies; yes there'll be some telecoms work but it will not dominate your time, instead you'll work with some of the leading tech companies in the world (and yes get to speak to some of their attorneys and inventors instead of a foreign associate).

Part Qualified/Qualified, Mechanical Engineer, Yorkshire, circa £75-£80,000

Love cars? Great, this firm has loads of automotive work and a great deal of other stuff to boot. Lots of it is direct, some is international (but direct) and they encourage attorneys to provide strong commercial advice to their clients instead of simply following instruction. The firm needs an attorney who can fit into an existing team but who also likes a bit of independence. You will be given the opportunity to develop your own style and your own clients. You will also be a key part of the firm's growth and be an influencer of commercial strategy.

Electronics, Finalist/Newly Qualified, London, £65-£80,000

A modern firm with emphasis on high performance and high quality is seeking a finalist or newly qualified attorney with a background in electronics. The department has a fabulous reputation across the industry, both in terms of their approach and client base. They are ahead of the curve and strive to separate themselves from what commonly defines most in the profession, with market leaders counted amongst their loyal clients and the ability to refer to themselves as a full service IP firm – with litigation, licensing and commercial matters all part of your day-to-day.

2 Years' PQE, Mechanical Engineer, Midlands, Circa £80,000

An opportunity for a candidate with 2 years' PQE has arisen with this well-known and well versed firm. The intimate size of the team will ensure your achievements will be observed and rewarded accordingly, as well as encouraging a vibrant environment with ideas and input welcomed. The portfolio of work is incredibly diverse allowing no two days the same, with the opportunity to work closely with sole inventors, SMEs, universities and R&D, as well as larger international names in the engineering field.

Part Qualified/Finalist Patent Attorney, Mechanical Engineer, Midlands

Part Qualified £35-£40,000, Finalist: £50-£60,000
Given that the Midlands is at the heart of the automotive sector as well as a great deal of other UK industry, this role offers huge diversity of both work and clients. They're also really good at training people, with an excellent track record of their attorneys passing the examinations on the first attempt.

Finalist/Newly Qualified, Electronics/Physics, Midlands, up to £80,000

Large corporate clients, small businesses with interesting innovative ideas, a wide range of legal and technical challenges and being part of a commercial firm with genuine opportunities for career advancement. Not only that but you will work with some really fantastic people who are very knowledgeable and prepared to invest time in you both pre and/or post qualification to ensure that you are a fully rounded patent attorney who can progress through the firm. The work is pretty balanced and you won't be stuck doing the one thing that you hate but rather enjoy a mix of drafting, prosecution and contentious work as well as being encouraged to face clients in person and attend networking events. A genuinely exciting opportunity for someone seeking a little less formality and a little more variety

Part Qualified, Physics/Electrical Engineer, Midlands, £40-£45,000

You won't be sheltered in this role – speak to clients of your own; attend networking events; be involved in contentious work and be challenged to become a better attorney. The training regime is excellent and you will benefit from working alongside some of the best attorneys in the region.

Finalist Patent Attorney, Chemist, Cambridge, £50-£55,000

A fun place to work with a great local team and a healthy mix of direct and indirect clients. The workload should be pretty varied and as well as ample drafting and prosecution, you will also be encouraged to develop your experience of EPO contentious work.

Finalist, Electronics, Cambridge, £55-£60,000

Work with commercial, entrepreneurial inventors and corporates both local and international. Meet with clients and help develop an intellectual property strategy; and be encouraged to develop your commercial skills which will help pave the way for long term career advancement.

Part Qualified, Electronics, London, up to £50,000

Money, money, money. Ok it's definitely not all about money – but are you sure you are paid what you're worth? This firm may think differently but they can back up the salary with some fabulous clients and the chance be involved in supporting some hefty IP litigation projects.
