

# At Fellows and Associates we're not all about the obvious...

## **Attorney, Chemistry Background, Foundation/Finalist, Cambridge**

Join one of the largest firms in the UK with an impressive international reach. This firm has the resources and reputation to offer ambitious candidates the best start in their career, with access to a wide range of direct clients, a challenging and intricate portfolio and the freedom to tailor your workload to your interests (to an extent). Don't let the size of the firm fool you, there is a real sense of integration across the offices and emphasis is placed on individual performance rather than overall productivity. There is a dedicated administration team and industry leading technology, ensuring you can truly commit to your clients and offer a fully consultative and in depth service.

## **Business Consultant, Patent Attorney, Electronics, London, £80,000**

A very different sort of firm, with a highly unusual business structure, it would suit a qualified attorney who knows that they do not wish to work for another more conventional private practice but haven't completely decided what that means as yet. You're likely to really get your hands dirty in this position, advising clients on business and commercial strategy from an IP perspective. There is a large amount of direct client work and you won't get stuck doing the same thing all of the time such as endless telecommunications work. You will be given a budget to pursue your own ideas, such as business development trips or new ideas in working practices.

## **Electronics , Part Qualified, Patent Attorney, London, Circa £45,000 plus substantial bonus**

Want to work in a fast paced and highly integrated office environment? Is realistic career progression and the freedom to steer the direction of your own portfolio important to you? What about the option to take on additional responsibility in areas such as marketing and brand awareness? Done, done and done. Have the flexibility to become truly immersed in your clients' work and be regarded as an integral member of their team, not an outsourced service. This firm have an outstanding reputation across the world, with a substantial amount of direct work originating from overseas.

## **Biotechnology Specialist, Qualified , London Up to six figure remuneration package**

Excellence is the name of the game with this firm. Ideal candidates will be specialists in one or more fields within the Biotechnology and Life Sciences spectrum and thus be in a position to offer a focused and targeted service to their clients. The firm look for a flawless academic history and this is reflected in the calibre of clients that they attract. They may be traditional in their candidate brief but they are far from traditional in their working practices, with leading software and flexible working conditions allowing their attorneys to excel.

## **Part Qualified, Mechanical Engineer, South Yorkshire, £30-45,000**

This firm will consider any candidate from foundation level up. Given the industrial base in the region, you will work very closely with companies and be a key part in the development of their intellectual property strategies. Clients come from sectors including: automotive, industrial machinery, energy and construction. The work is very balanced between drafting and prosecution, local and international. The firm's training programme is amongst the best in the UK.

## **Electronics , Part - Newly Qualified, Patent Attorney, London, £45-£65,000 (part qualified/finalist)**

At this practice as part of a broad based electronics and engineering team, you will enjoy a balance between highly technical electronics work and a range of rather quirkier inventions. The firm really likes its attorneys to develop their own working style, so whilst you will be supported well by Partners, you will also be given some latitude to build some experience of your own.

## **Attorney, Mechanical Engineer, Foundation Finalist, Birmingham**

Establishing an IP career in London can be really difficult. And it's not like you can relocate elsewhere and still achieve the same goals, or is it? This firm will allow you to grow into a fully capable and extremely successful attorney away from London but without having to sacrifice all the perks of the Capital. There is a modern ethos, with a focus on pushing the business forward and not being restricted by the traditions of the past. Ideally they need attorneys on the cusp of qualification (although foundation level will also be considered) who are looking to be in the thick of the action, be involved in work with an international impact, create inspiration for clients and be the driving force behind their IP strategy.

## **Electronics Finalist/Qualified, Attorney, South Yorkshire, £55-£75,000**

Be part of a fast growing Yorkshire operation that has developed close relationships with companies locally (leading to some interesting and pretty varied direct client work) as well as some exciting corporate work. You will be part of the firm's evolution strategy so will help the firm grow through involvement in active business development and ultimately support the development of new hires as the firm builds.

## **Qualified Patent Attorney, Mechanical Engineer, West Yorkshire, £75-£85,000**

A fiercely modern and highly successful firm is in need of a qualified mechanical engineer to join their operation in the North. Their culture resists the norm of traditional private practice, with unique brand strategy, expansion into new markets and high emphasis on litigation defining them as one of the 'go to' firms for attorneys looking for something (dare we say it) different.

## **Partner/Partner Designate, London - No Following Required**

Disgruntled? Don't think you're getting your fair share? Worried about being in business with your colleagues long term? Can't see a way out because you are already too invested with your current firm? There really are options. The London based firm we are working with are enjoying a period of high profitability and considerable growth. Some of this has been achieved by recruiting sensibly - backing new hires to succeed because they are good at what they do and not because they bring something with them. The firm are very realistic in their expectations of experienced new recruits and will work with you to develop a plan to both achieve what you want to achieve but also manage the risk from your point of view and theirs. Their aims are long term viability for your practice so you will not feel the pressure to charge high billable hours too quickly. The practice is willing to consider patent attorneys from any technical discipline as well as trade mark attorneys.

For more information or to apply to any of these roles speak to Pete Fellows or Philippa Field on 020 7903 5019 or email: [contact@fellowsandassociates.com](mailto:contact@fellowsandassociates.com).
