

*Ring Fellows and Associates because we are ridiculously good looking\**

*\*We might not be ridiculously good looking*

**Senior Biotechnology Specialist, London, Up to £90,000**

This firm are able to offer a challenging portfolio of oppositions work; access to a vast range of direct clients, from sole inventors to large multinational conglomerates; as well as litigation; high value prosecution and due diligence. They encourage their attorneys to adopt a consultative approach when liaising with clients, providing strategic advice that is instrumental to the development and commercialisation of their IP portfolio. They operate as a meritocracy and ensure career progression based on genuine performance. The Life Sciences department enjoy a strong reputation, with industry leading clients and respected Partners.

**Mathematics, Part Qualified/Qualified, Oxford, c. £40,000/c. £67,000**

Act as a support network for the Partners and other fee earners and assist in handling a varied portfolio of direct client and agency work, with drafting and prosecution, both in the UK and Europe; liaising with foreign counsel; freedom to operate; and opinion and advisory work being a regular part of your day. The firm have spared no expense in providing an innovative case management system and have invested in a highly experienced clerical and administrative network. Ideal candidates are hoped to have a strong academic background in Physics, Physical Sciences, Electrical Engineering, Geophysics or Mathematics.

**Part Qualified, Computer software/Telecommunications, Cardiff, £Neg.**

Join a boutique firm with a growing network across the South and Midlands who require a part qualified attorney, (although those with less experience will also be considered), to help manage and grow their client base in Cardiff. The firm currently work closely with a diverse range of clients with technologies covering the full spectrum of the electronics and physics fields. You will become a key collaborator in their IP strategies and be integral to the development and commercial success of their future plans, including some trade mark and design work. This is a long term position with an assured career path and bonus structure in place, almost all but guaranteeing any new recruit the potential to become the next generation of Partner.

**IP Lawyer, London, 4-6 Years PQE**

This position provides a stepping stone to bigger and better things with a firm with a fast expanding and highly credible intellectual property department. Being a key member of the team, your role will be autonomous and work across a very broad range of non-contentious and contentious IP. You will have a proven track record and demonstrable range of knowledge. You will have influence on how the department develops over time and will be supported and encouraged to develop commercial opportunities (although they currently have an excess of IP work). From a cultural perspective the firm has a collegiate atmosphere and has a very positive approach to helping its lawyers maintain a healthy work-life balance.

**Newly Qualified, Electronics, London, £55,000+**

What better way to start off your qualification with the best possible footing than with this forward thinking and modern practice in the heart of the capital. They have a healthy Partnership capturing a balanced mix of traditional and contemporary work ethics, allowing for an extremely varied portfolio of long established and loyal clients, as well as state of the art and innovative technologies born out of industry of late. You will be trusted with your own client base and you will have the freedom to build upon this through attendance at local and international networking events and marketing opportunities.

**Electronics, Finalist, Various locations, £50,000+**

Have the opportunity to dictate your own location (to an extent) with the pick of offices with this leading firm of patent and trade mark attorneys. Gain exposure to the full gamut of patent activities with invention harvesting, due diligence and FTO, full commercial evaluation and development strategy as well as plenty of original drafting and prosecution to keep you busy. There is significant support and training available to you, including regular mentoring and the opportunity to gain experience alongside recognised and respected Partners in the field.

**1-3 Years' PQE Engineering or Electronics, London, £65-80,000**

Join a firm going from strength to strength, with an impressive (and rather enviable) office location and a growing portfolio of internationally recognised names in the engineering and electronics fields. They operate a strong team mentality, with minimal micro management and contributions welcomed and acknowledged from every level. Responsibilities will include offering strategic and commercially viable advice to a range of clients, invention harvesting and due diligence, as well as tackling challenging contentious issues both in the UK and before the EPO. There is a solid training and appraisal scheme in situ allowing for clear and achievable career progression to be available to those who earn it, with a generous bonus scheme along the way.

**Part Qualified, Electronics, Yorkshire, £35,000+**

This is a fantastic opportunity to join a firm at the forefront of innovation, both in terms of their Electronics department and across the wider IP industry. They have made a name for themselves for going against the grain and offer a modern work ethic, coupled with the client base and success akin to a more traditional or longer established firm. There is the opportunity to offer your client base a multi-dimensional service, with litigation and ongoing commercial advice regarded as a part of your day-to-day. State of the art communication software allows you to remain integrated with the firm's multiple office locations across the UK and internationally, encouraging the regular exchange of ideas and advice and ensuring you will not feel isolated.

**Part Qualified, Electronics, London, c. £40,000**

This firm is regarded as somewhat of a dark horse in the industry, being relatively young in establishment but growing at a strong and steady rate. They are modern in their thinking and are meritocratic, rewarding those who deliver. In terms of career progression they have an excellent track record in making Partners internally and tailor their training to suit the individual, allowing you to become well versed in the full spectrum of patent duties. Become the confidante, advisor and advocate for an eclectic client base with an intricate mix of pioneering technology, and have the freedom to build upon this base to reflect your own strengths and interests once qualified.

**Patent Paralegal, c. £30,000**

Work for an exciting start up business growing its administration functions. You will have a clear understanding of process in particular PCT and EP validations. Career progression is very likely as the business has a structure that will allow you to move up over time. In the interim you will be regularly interacting with clients, helping them come to solutions to processing problems.
