

**Hostile work environment?**

**We can help with that**

**Finalist up to 2 years' PQE, Chemistry with experience of Biotechnology, Midlands, Up to £65,000**

This firm is in need of a unique candidate to fill an equally unique role. The portfolio available is a diverse mix of food technology, chemical engineering and immunology, all of which originate from direct clients in the local area. You will also be able to add to your client base to reflect your strengths and interests through business development trips abroad and the opportunity to speak at internationally recognised conferences, such as BIO. Ideal candidates will have a chemical background and degree with perhaps a biotechnology (or related) PhD, although pure chemists will also be considered.

**Part Qualified, Mechanical Engineering, Midlands, £45,000+**

Join a firm with a solid reputation in the Midlands and gain exposure to an interesting work portfolio consisting of cutting edge technology, commerce and law. You will work closely with the Partners and have the opportunity to deal directly with their clients, as well as managing agency work and assisting the fee earners. The firm believe in experiential learning with drafting, prosecution, opinion and advisory work in the UK and Europe becoming your responsibility from very early on. There is also significant contentious work, allowing you to attend and conduct your own oppositions and appeals at the relevant offices and tribunals and at oral hearings.

**Part Qualified to Finalist Trade Mark Attorney, London, £40-55,000**

This is an exciting time for the Trade Mark department of this leading firm. They are implementing an extremely proactive expansion plan following a string of successful years in order to grow their already strong trade mark team. There is plenty of work readily available, including significant filing and prosecution as well as handling dispute resolution, infringement and licensing. The new recruit will also be expected to seek out and win new tender, represent the firm at local and international networking events and be a future mentor to the next generation of attorneys joining the team.

**Finalist, Electronics, London, c. £60,000**

The IT&E department of this firm is particularly commercially minded and prides themselves on offering a progressive working environment in impressive office surrounding where meritocracy reigns supreme. The firm has invested heavily in state of the art office facilities, video conferencing and a move to a paper-lite system, as well as significant time spent on recruitment to reflect their growing work load. They can offer an extremely varied working day, including international patent prosecution, preparing and filing registered designs and infringement opinions.

**dyson**

**In-house Patent Attorney, Dyson, Wiltshire, £55-£65,000 + Benefits**

Dyson is currently in the implementation stages of an expansion plan and is actively looking for a finalist or newly qualified patent attorney to assume responsibility for the designs and inventions within a particular discipline of their business. Projects will be managed from initial conception to launch and regular dialogue with the R&D and product developments team will be required; advising them on issues including potential risks to third parties' rights, as well as contact with brand protection and marketing. There will be significant original drafting and prosecution, competitor search and analysis, strategic advice and product review, as well as preparing and filing design applications in the UK, Europe and via foreign agents in the US and Japan.

**Sales Engineer, IP Management Software, London, £50-£60,000 + Bonus**

An experienced IP sales professional is needed to further strengthen the Client Services team of this leading IP software company. They have enjoyed an expansion boom in the past year and received significant funding allowing them to invest heavily in growing their resources both in the UK and overseas. They have an impressive client portfolio of internationally recognised blue chip organisations, as well as smaller IP practices, firms of patent and trade mark attorneys and law firms. They offer flexible services tailored specifically to complement their clients' individual needs, ranging from large global portfolios to cloud based packages. Ideal candidates will have least 3-5 years' experience working in software sales and will also have experience of the Intellectual Property sector. Close proximity to London is beneficial, however suitable candidates from across the UK (and Europe) will also be considered.

**IP Lawyer, London**

This very broad IP role with a balance between non-contentious and contentious work could represent a significant step up for a solicitor seeking more autonomy. You will be part of a team that is very successful and is generating a great deal of work with a particular focus on copyright, designs, trademarks and licensing. Clients are also quite a variety and all but include hi-tech start-ups, regulators, not-for-profit organisations, educators and certifying bodies. Given the recent growth of the Intellectual Property department and the view of the Partnership that it is a key part of their business strategy, there will be substantial career potential as the role progresses. Suitable candidates should be qualified solicitors with confidence and experience enough to work autonomously with minimal supervision.

**Junior Paralegal, Belgium**

Move to Belgium and work for a fast growing business who is expanding its infrastructure. Ideally you will have a good knowledge of the PCT process, gained from a few years as a patent focused paralegal. You will be responsible for management of PCT national/regional phase entries, working with foreign associates as well as consultancy work such as helping with the development of an online platform. The role has scope to increase responsibilities over time, such as managing a small team or being involved in business strategy. The company has a highly inclusive friendly environment and they encourage creative thinking and input from across the group. You will enjoy a great deal of autonomy and the opportunity to become an essential part of the organisation as it develops.

**Qualified Patent Attorney, Electrical Engineering, London, c. £85,000 + £10-15,000 bonus**

This close knit team contained within in a larger highly successful firm of patent and trade mark attorneys is looking for a qualified patent attorney with a background in electrical engineering (or related discipline) to join their ranks. Attorneys are encouraged to work closely with their clients in order to gain an intimate understanding of their IP and business goals and offer a service that is strategically and commercially tailored to their individual needs. The firm has made a considerable effort to consolidate their HR and administrative function, allowing the fee earners to concentrate on building and managing their client base, with as little or as much support as they need.

**Part Qualified, Telecommunications, Yorkshire, c. £48,000**

If a firm with an international commercial outlook but with a training scheme focused a little closer to home is up your street then look no further! Their support structure and integration across offices is unrivalled in the industry, with consistently high pass rates for both the EQEs and UK examinations recorded each year. They can offer a mixed bag of experience with litigation and more contentious issues being a staple part of their attorneys' diet and a young Partnership indicates possible career progression could be available in the future.
