

At Fellows and Associates

we'll try everything

to get you a great job

Patent Attorney, Qualified, Electronics, Engineering or Physics, London, Up to £90,000

A broad mix of work and Partnership opportunities might be a driver for joining this firm. They want attorneys who will contribute to the development of the practice via training less experienced staff and working with the Partners on key initiatives. There is also the opportunity to earn a considerable amount of money. They have one of the best bonus schemes in London and are amongst the top 5% of firms when it comes to base salary.

Patent Attorneys x2, Engineering, Scotland

Work with a cutting edge engineering portfolio with a highly entrepreneurial client base. You will be as much an IP Advisor and commercial strategist as you will a Patent Attorney and hence the role will really suit someone who wants to be involved with their clients when they make key decisions for their businesses. The requirements are relatively flexible, candidates from finalist up to several years post qualified will be considered.

Electronics, Part Qualified Patent Attorney, London, Up to £45,000

A firm that not only excels at training but also is keen that its attorneys get a fully rounded experience. They'll ensure that you will know how to draft and prosecute a patent of course but will also give you a taste for contentious and highly commercial work. You will speak to clients directly, many of which are household names, as well as some smaller very dynamic businesses including VC backed start ups. The work mix is pretty broad from software to control systems and telecommunications.

Finalist Patent Attorney, Electronics/Physics, London, Up to £60,000

Don't want to wait for those last examinations before you move? Worried that you won't get the same financial opportunities if you move now than wait until the results next year? This firm has it sorted – they'll guarantee your salary once you qualify but pay very well in the interim so you can improve your lot now without waiting. Added to this, given the pace at which their growing, the opportunities in the medium and longer term seem really rather fantastic.

Patent Attorney Qualified, Software, London, c. £85,000

A role for an IT specialist patent attorney working with, and solving problems for, many of the largest software companies in the world. The role is internationally focused and many of the challenges you will face will be developing defensive and offensive patent strategies in conjunction with your clients. You may gain involvement in international litigation both as support or more active involvement. With some major recent client acquisitions this position is pretty rare in that the commercial opportunities that will be available to you would be difficult to find elsewhere.

Engineering Patent Attorney, London, £70-£80,000

Automotive, aerospace, oil and gas, start ups, large international companies, big UK businesses, universities, technology transfer, drafting, prosecution, due diligence, FTO, oppositions, oral proceedings. Plenty of variety here. You will also be put on a pathway to Partnership via an innovative support structure that will give you the skills you need to get the best chance to progress. The firm listens to its staff so you will enjoy active involvement in the development of the firm over time.

Part Qualified, Patent Attorney, Telecommunications, London, £45,000

Telecommunications but with breadth. You won't get stuck prosecuting the same boring things over and over again with minor tweaks. Given this firm's pretty broad client base you should get good variety and a mix of challenges to face. They also have a fluid structure that allows attorneys to get experience of working with different people on different types of work. Their training is amongst the best with a near perfect pass rate.

Part Qualified Patent Attorney, Chemist/Materials Scientist, South

Work with a Partner who is keen to develop his practice by growing his team. He facilitates staff development through giving autonomy on some very interesting work. Given the nature of your likely portfolio you could become a resident expert within the firm which should allow for significant opportunities as your career develops. The firm are a growing force in the sector, have a great mix of local direct clients, big international companies and as a consequence a pretty vast variety of work for you to get involved with.

Qualified Patent Attorney, Electrical Engineering, London, Up to £100,000

Achieve a great level of financial reward if you have experience enough to work autonomously and the confidence to develop strong working relationships with clients helping them to develop their patent portfolio. Ideally you will have a fairly broad technical background – not too electronics, not too engineering but somewhere in between. The work varies a fair amount so a good all rounder is what's required.

Biotechnology, Qualified Patent Attorney, London, Up to £80,000

Join a leading biotechnology practice with a portfolio that includes a great deal of contentious work. This excellent firm has been growing rapidly and should be able to offer fantastic career development potential for the right applicant. They work with many of the largest biotechnology companies in the world and certainly encourage their attorneys to be very involved in the sector, via conference attendance and networking. They are very down to earth with a casual work environment and a 21st century philosophy.
