

*We can tell you
the difference*

Finalist to Newly Qualified Patent Attorney, Electronics/Engineering, South, £60-£70,000+

The IT & Engineering team of this well-known firm is looking to add to its vast knowledge pool with an additional hire, with a technical background in electronics or engineering or both. They have a reputation for lateral thinking, both in the solutions they provide their clients and how they operate the business and implement their working ethos. You will be exposed to an interesting and ever growing client base and be responsible for devising highly strategic plans to protect their IP, accounting for any oppositions that may occur and ensuring the product is safeguarded and its commercial value still retained after future developments and breakthroughs in technology. The firm is all for fairness in how it progresses its attorneys and ensures that those who do well, no matter what the level or time in the firm, are rewarded accordingly.

Patent Search Specialist, South, £35-£40,000

A specialist team of patent and trade mark attorneys is looking to expand their highly dedicated Search department with an additional Patent Searcher. You will be working closely with the Partners and fee earning team to help identify possible obstacles regarding their client's IP portfolio, including existing competitor products and prior art. You will be responsible for the evaluation, classification and distribution of information in a variety of formats, as well as the preparation of clear and detailed summaries for further analysis. Additional duties will include carrying out audits and proactively providing presentations and individual consultations to staff members and external parties on patent and search analysis. Ideal candidates will have an excellent academic background in biotechnology or chemistry and will have experience working in a fast paced research environment

Newly Qualified Patent Attorney, Biotechnology, London, c. £65,000

Join a leading firm with a truly distinctive approach to business. You will be part of one of the largest teams in Europe and work alongside litigation, commercial and corporate specialists on cases spanning from initial IP capture, patent drafting and prosecution to oppositions, appeals and litigation. Ideal candidates are hoped to range between newly qualified patent attorneys and those with up to 2 years' post qualification experience, with a technical background in biology, biochemistry, genetics or similar. Knowledge of patenting in the antibody field and previous in-house industry experience would be a benefit, but is not a prerequisite to apply. The firm invests in the ongoing development of its staff and is keen to find a candidate who is interested in technology innovation and legal breakthroughs in their field of expertise. You will be fully supported in your career advancement in a close knit and friendly team environment and will benefit from the flexibility that only such a well-established and successful firm can offer.

Finalist to Newly Qualified Patent Attorney, Chemistry, Midlands £50-£65,000

Work closely with an interesting range of clients, from multi-national blue-chip companies to SMEs and entrepreneurs, in a variety of sectors, including automotive, mechanical, life sciences, medical, chemical, electrical, food and drink, and manufacturing. The firm also has outstanding links with the academic institutions in the region, advising inventors, guiding spin-outs and assisting technology transfer departments to maximise the value of their Intellectual Property. You will be responsible for providing exceptional client service for an existing portfolio, as well as supporting the acquisition of new clients to expand the team's fee earning capabilities and ultimately becoming responsible for the management and administration of your own client base. You will be actively involved in IP capture, the drafting, filing and prosecution of patent applications in both the UK and Europe and responsible for directing prosecution of patent applications in various jurisdictions outside Europe via local attorneys.

Finalist Level Patent Attorney, Biotechnology, London, c. £55,000

Be a strategist, advisor, mentor and advocate for some of the top ten biotechnology companies in the world. You will be responsible for shaping and implementing your clients' Intellectual Property programmes both here in the UK and across the globe and be exposed to a significant opposition and litigation practice, as well as high value prosecution and strategic due diligence work. The firm hold a strong reputation in the industry and the Life Sciences team in particular benefits from having leading Partners in the field at the helm. Ideal candidates will be nearing qualification, although those with 2 years' experience having completed the Certificate in IP Law (or equivalent) or those who are recently qualified will also be considered. A strong academic background in biological sciences is required.

Part Qualified Patent Attorney, Electronics, London, c. £48,000

This firm has struck an excellent balance between a modern and forward thinking working environment and the reputation and client base that only a traditional long standing firm can hold. The innovative IT infrastructure allows for considerable flexibility for remote working, as well as a paper-lite office and a huge peer and Partner led support structure for those entering the business. The firm is not afraid to put you in front of clients from early on and believes that your development within the firm, and career, is achieved through both experiential learning and academic study. There will be a significant volume of work waiting for you, as well as the opportunity to build your own practice both locally and overseas through the firm's strong international ties.

Recordals, Operations Manager, Brussels

Lead the Recordals Division for this innovative Brussels' based business. You will need to have thorough and extensive knowledge of the recordals process but also exhibit commercial skills, for example working through a budget and providing considered creative solutions to clients as well as working with an extensive support base. This role would suit a candidate with circa 5 years' experience working within an IP recordals role (or a role with significant recordal work); however you might also be a patent attorney considering a change of career or someone similar considering a move within IP but away from their current position. Much of the role will require diplomacy – you should enjoy talking to people, resolving issues and building a contact base. As a key member of the organisation you will be instrumental in the development of this department and will be active in its promotion internally and externally which will require reporting to management and working with teams from other department on specific client projects.

Nearly/Newly Qualified Trade Mark Attorney, London, £58-£65,000

This role will give you the chance to work effectively alongside commercial and litigation specialists, solicitors and corporate lawyers in a highly collaborative and integrated working environment. You will be responsible for significant trade mark prosecution including searching, filing and opposition; drafting and progressing UK and international trade marks; liaising with clients and international attorneys; profiling and summarising documents; preparing documents for hearings; proof reading, copy checking, indexing, archiving; and undertaking legal research as and when required.

For more information or to apply to any of these roles speak to Pete Fellows or Phillipa Field on 020 7903 5019 or email: contact@fellowsandassociates.com.
