

You can go your own way

Finalist Level Patent Attorney, Electronics, London, £55-60,000

This firm is growing quickly but they still have room for individuality. They have a broad scope of work mixed across international corporations, SMEs and some highly complex cutting edge technology. They can offer more breadth of experience than a typical patent attorney role, with the potential to be involved in much more contentious IP work and possibly commercial IP such as licensing. They are small enough to be able to offer considerable flexibility in respect to how your career develops. But then they are large enough to work with some very exciting projects and have an extensive base of international contacts. Culturally they are unlike the vast majority of London firms so if you want something quite different from your existing environment they will have a great deal to offer.

Qualified Patent Attorney, Engineering, South West, £72-78,000

There will be a significant volume of work waiting for you at this firm, as well as the opportunity to build your own practice both locally and overseas through well-established strong international ties. The firm has invested heavily in this office, providing a comfortable yet modern working environment with state of the art technological support and communication functions allowing for streamlined working both in-house and across the firm's additional bases. Clients encompass the full spectrum of engineering disciplines, including mechanical and heavy engineering; aeronautics; automotive; construction engineering; marine; medical; and power generation. Career progression is openly discussed and you will be fully aware of the steps you need to take in order to achieve it.

Overseas Graduate Level Opportunity, £25,000

Entering the IP profession can be tough, you might have applied to a lot of firms and received not much in the way of a positive response or you may have attended interviews in a very competitive environment and lost out. We have an alternative solution. We are currently recruiting an international position for a firm that will provide full training and relocation support for graduates from a discipline related to electronics or telecommunications. The career path is likely to be very different to a typical UK based trainee – with more of a focus on the commercial side of IP as well as the technical. As a consequence, there'll likely be some international travel and certainly a great deal of contact with your client base earlier in your career than expected. If you want to kick start your career but are also pining for a post degree bout of travelling then perhaps this is a way to combine the two.

Newly Qualified Patent Attorney, Electronics, North, c. £65,000

Join a firm with a modern outlook on the sector, a business model that has successfully facilitated substantial growth and expansion since their launch, and one that encourages their attorneys to share in their contemporary approach. There is a collegiate working environment where ideas are cultivated and developed among the team and plenty of opportunity to build and tailor your own practice to suit your strengths and interests. Work on a challenging portfolio ranging from technological breakthroughs pioneered by sole inventors and SMEs through to large scale financial and banking systems for large multi-site corporations. The firm is not afraid to put you in front of clients from early on and believes that your development within the firm, and career, is achieved through a combination of both experiential learning and academic study

Qualified Patent Attorney, Electronics, South West, £75-80,000

This firm has struck an excellent balance between a modern and forward thinking working environment and the reputation and client base that only a long standing and consistently successful firm can hold. The innovative IT infrastructure allows for considerable flexibility for remote working and communication across the offices, as well as a paper-lite office and a huge peer and Partner led support structure for those entering the business. The firm is keen to continue their growth plan and have already secured a number of successful sites outside of the UK, as well as creating and recruiting new roles at all levels of seniority across their local offices rather than just simply replacing leavers.

Newly Qualified IP Solicitor, London, £Negotiable

A record of successful hires and increasing workload over the past year has resulted in the Litigation team of this leading boutique Intellectual Property specialist firm increasing their numbers further with a new requirement. You will be heavily involved in litigation across Europe and be encouraged to collaborate with your patent attorney co-workers on patent and design cases, as well as some transactional aspects of IP. The firm works closely with their clients, being on hand from initial conception and invention harvesting through to the commercial management and international protection of their IP. Candidates are hoped to have recently qualified, however the firm will consider candidates with up to 3 years' post qualification experience.

Part Qualified to Finalist Level Patent Attorney, Computer Software, North, £35-£55,000 (dependent on qualification status)

A boutique practice with multiple outfits across the UK is growing their Electronics department and is in need of a part qualified or finalist level attorney to add to their ranks. You will be responsible for managing a niche portfolio of intriguing clients, with a technology base including intricate and detailed computer architecture, mobile technologies and cloud security. Possessing a commercial edge and the ability to recognise and implement viable business opportunities will be beneficial; however there is also a place for those looking to keep their head down and plough the field. A wealth of experience across the Partnership and senior attorneys will allow you to gain all the necessary knowledge needed to qualify and establish yourself as a key contributor to the firm, with a substantial amount of supervision and support available at your disposal.

Senior Associate, Engineering, Scotland, £Highly Competitive

Help drive the success of a new office in Scotland for a leading firm of patent attorneys with a reach already secured across the UK. The firm needs an attorney with a track record in the highest levels of client service and an inking towards business development to manage a strong portfolio of already existing contacts and clients, as well as helping to build the practice further. The client base is very diverse and often you will be working with Business Directors and Chief Executives as well as Heads of IP. You will be required to develop dynamic Intellectual Property strategies that reflect a highly changeable local marketplace. This will include invention mining, drafting and patent prosecution in the UK and Europe, as well as instructing foreign associates on behalf of your clients. There will be training and mentoring responsibility as soon as a trainee base is put into place (the implementation of which, you will have input).

For more information or to apply to any of these roles speak to Pete Fellows or Phillipa Field on 020 7903 5019 or email: contact@fellowsandassociates.com.
