

Roar?

Biotechnology Patent Attorney, Partner/Partner Designate, London £Six Figures

Unlike a great deal of firms who recruit new Partners, this position does not require a client following. However, you will of course have the requisite commercial skills to enable you to connect with businesses around the world and develop the firm's offering. There is an existing client base but there is potential for the practice to develop in a way of your own choosing. The role would likely suit an attorney hoping for some greater freedom to do their own thing without stepping on the toes of their peers too often. You will be able to develop your team, both in terms of those already there and those in the future you may recruit as your business grows. The position certainly offers full equity Partnership potential given the crucial nature of the work you will be doing for the firm's overall service provision. In respect to their culture, they are friendly down to earth and very reasonable. They encourage attorneys to have their own ideas and are supportive of new initiatives. They want to make sure they find an attorney who fits into their team and can be part of the business for many years to come.

Part or Newly Qualified Patent Attorney, Engineering, North Up to £45,000/£60,000

Join a firm with an extremely impressive heritage and be partnered with some of the most progressive and innovative companies in the world. You will be working closely with clients across the UK, Europe and around the world, protecting their current IP portfolio and helping them gain further commercial success through identifying new patentable areas of their business. The firm is highly commercially minded and adopts a refreshing approach to how the business is run, with input welcomed from all levels and the flexibility to change policy if it benefits them either financially or in favour of staff wellbeing. The team has a wealth of experience born from time spent both in private practice and in-house, and works in a wide range of technological areas, including road, rail and marine; packaging; engineering materials; housing and construction; automotive; and medical devices. Ideal candidates will range from part qualified up to two years' PQE.

Qualified Patent Attorney, Electrical Engineering, South West, £64,000+

The Electronics team at this firm is one of the largest in Europe and tackles intricate and highly valuable IP issues across the full spectrum of electronic subject matter, including telecommunications; computer software; medical equipment; computer network and systems; consumer electronics; and defence, aerospace and avionics. You will have the opportunity to work with recognised and respected multinational conglomerates, as well as managing portfolios for start-ups and sole inventors, SMEs and academic institutions. The team has strong links with local and international industry organisations and encourages its attorneys to attend and contribute to conferences and networking events. Newly qualified candidates up to those with five years' PQE will be considered and a strong academic background in electronics, electrical engineering or a related discipline is required.

Part/Recently Qualified Patent Attorney, Telecommunications and Software, North, £47,000+

Are you a computer enthusiast? Do you seek out the latest innovations in software and telecommunications? This role will allow you to be a part of the cutting edge electronics field with close partnerships with leading clients, helping to develop their IP and safeguarding their portfolio so it is commercially viable and protected across the world. The firm is growing quickly and wants to facilitate this growth with an electronics specialist to help look after their existing client base and build the business further through identifying and securing new revenue streams. There are excellent links between this office and the firm's additional locations, allowing you to learn from and collaborate with a larger group of peers but whilst retaining a close knit and supportive working environment.

Qualified Patent Attorney, Electronics, Partner/Partner Designate, South East, £90-£120,000

Join an existing team with an excellent client portfolio who wish to expand their Partnership and offer opportunities to attorneys who are keen to help the practice develop organisationally. You should have a superb academic pedigree, love the work of a patent attorney and be keen to share your knowledge with others. There is some flexibility on technical specialism although you should be comfortable with work broadly within 'electronics'. You will likely enjoy mentoring people and certainly be comfortable speaking to clients, both old and new. In the long term there is every chance that the position will develop to full equity Partnership, and given the profile of the role within the firm that does seem to be reasonably likely. The practice do not require a client following for interested attorneys and will consider both existing Partners and those that covet Partnership.

International Graduate Opportunity, Physics/Electronics, £25,000

We are working with a very well established and connected overseas firm who are recruiting a physics graduate to help further develop their international connections. This is a unique opportunity for a graduate looking to begin their career in IP and offers an alternative experience track to what would be likely offered at a UK or European firm. Your responsibilities will take more of a commercial focus, with travel to existing and potential clients across the world and using your technical knowledge to assist qualified attorneys in developing their client's portfolio and in tackling IP and litigious issues. The firm have plans for this role in the long term and so ideal candidates must be happy to relocate overseas for the foreseeable future.

Part Qualified or Finalist Patent Attorney, Electronics, London, £45-£55,000

A very broad, very autonomous role for an attorney who feels they are ready for more responsibility in an environment that allows a great deal of freedom. The client base is extraordinary, with a great deal of interesting US originating direct client work, a lot of advisory work and exposure to aspects of the job other than preparation and prosecution, such as patent litigation. The firm has some very high profile attorneys for you to learn from and who will be keen to support you through your final examinations in an ambitious timeframe. Whilst it may be a recruitment cliché to say it, this firm genuinely does offer something different from the rest of the field.

Qualified Patent Attorney, Electronics, South West, c. £70,000

If you're looking for a new home where you can make the most of your technical knowledge and be challenged further with exposure to the latest technological breakthroughs, then this role is for you. The firm boasts one of the most well established (and well run) electronics practices in Europe and they show no sign of slowing down when it comes to achieving the firm's full potential. You will be dealing with highly strategic and valuable prosecution work, as well as exposure to litigation and managing multinational patent portfolios. Clients include mobile technology, computing and software; high-technology optics; cloud security; and image processing.
