

Don't be tide down

Did you see what we did there?

Recently Qualified Patent Attorney, Electronics, South West, c. £65,000

This firm has struck an excellent balance between a modern and forward thinking working environment, and a reputation and client base that only a long standing and consistently successful firm can hold. The innovative IT infrastructure allows for considerable flexibility for remote working and communication across its offices, as well as a paper-lite office and a huge peer and Partner led support structure for those entering the business. The firm is not afraid to put you in front of clients from early on, and believes that your development within the firm, and a successful career, is achieved through a combination of experiential learning and academic study. The firm is keen to continue their growth plan and they are creating and recruiting for new roles at all levels of seniority across their business, instead of just simply replacing leavers.

Part Qualified Patent Attorney, Engineering/Electronics, London, £35-£45,000

This firm is able to offer you the security that is only afforded by a reputation built through years of impeccable service, but with an approach that views the IP profession through fresh eyes. They have been actively growing their team through the addition of new members, as opposed to replacements, and are now in need of an experienced trainee to work within their Electronics or Engineering team (or both). The close knit working environment will allow you to gain early experience in all patent duties, including the drafting and prosecution of EU, British and PCT patent applications; representing clients at the EPO; offering strategic advice and managing highly valuable IP portfolios. There will also be the opportunity to travel to meet clients both within the UK and overseas, in particular Japan and the US.

Finalist Level Patent Attorney, Engineering, South West, £50-£55,000

Work in a progressive environment and benefit from first class direct client interaction, with regular face to face meetings across the UK and internationally. The individual technical teams within the firm adopt a highly collaborative approach, working closely with colleagues and clients to ensure the best possible outcome is achieved. There is never a dull moment, with attorneys constantly engaging with their clients, offering them frank and realistic advice in relation to existing IP protection, commercialisation and enforcement of rights, and with regards to potential growth areas for their clients' portfolios.

Finalist, up to 2 Years' PQE, Chemistry, London, £50-£75,000

This is a very exciting opportunity to join a firm with serious ambitions for its London operation. This role would really suit someone looking for variety of both client work and technical mix and who enjoys some of the commercial aspects of the job. The firm offers genuine career advancement and a very fulfilling time whilst achieving your goals. They are a leading name within the Intellectual Property sector and their client base will allow you to be at the forefront of some of the most innovative developments in the chemical field.

Qualified Patent Attorney, Electronics/Engineering, the North

A leading private practice has recently secured an impressive new client and is growing their Electronics team with an additional qualified patent attorney as a result. Responsibilities will include original drafting and prosecution in the UK and Europe, as well as liaising with and instructing foreign agents on the protection of your clients' IP in jurisdictions overseas. You will be expected to work closely with your clients in the initial identification of IP and provide ongoing strategic advice and support throughout the full IP lifecycle. Although business development is not essential in building your practice when you join (as it is already quite substantial) it is hoped that you will be comfortable in assisting in the future acquisition of new clients to expand the team's fee earning capabilities.

Part Qualified Patent Attorney, Electronics, Yorkshire, £40-£45,000

Manage a niche portfolio of intriguing clients, with a technology base ranging from intricate and detailed computer architecture, mobile technologies, software and cloud security, through to financial and banking systems for large multi-site corporations. You will need to possess a commercial edge and the ability to recognise and implement viable business opportunities, both for the benefit of the firm and to further your clients' IP. The firm enjoy a modern outlook on the sector, a business model that has successfully facilitated substantial growth and expansion since their launch, and encourage their attorneys to share their contemporary approach. There is a collegiate working environment where ideas are shared and developed among the team, and there is plenty of opportunity to build and tailor your own practice to suit your strengths and interests.

In-house Opportunity, Dyson, Engineering with Electronics, Wiltshire

Work for a leading British institution and be at the forefront of innovation. Dyson has an increasing work load due to heavy investment being made in the company's Research, Design and Development (RDD) projects. As a result, they are seeking another patent attorney to join the team. The role will involve a significant amount of drafting work (mainly mechanical subject matter) and prosecution, competitor search and analysis, and the opportunity to provide strategic IP advice that could impact the future direction of the company. You will work closely with the RDD and product development teams, advising on IP issues from the initial product conception right through to its launch onto the market. The work is stimulating and challenging, and the environment is characterised by energy, enthusiasm and initiative.

MATHYS & SQUIRE INTELLECTUAL PROPERTY

Qualified/Finalist, Biotechnology, London

Be a strategist, advisor and advocate for some of the top ten biotechnology companies in the world. You will be joining the practice of one of the pioneers in the industry with a stellar reputation; you will enjoy a refreshing dynamic approach to the profession, a challenging working environment, and one of the best bonus schemes around. You will be responsible for shaping and implementing your clients' IP programmes across Europe and will be exposed to significant oppositions and litigations, high value prosecution and strategic due diligence, and contentious work in the field of SPCs, regulatory data protection and orphan drug legislation. Driven by the practice, the Life Sciences department is one of the true success stories of the industry, continuing to grow strongly over the last ten years despite the historical economic uncertainty. The firm as a whole operates a true meritocracy and always ensures that the best people are rewarded; there is demonstrable career progression, the freedom to mould your practice to suit your interests, and access to some of the best clients and attorneys around. This is an opportunity not to be missed for those with the ambition and drive to excel in their field.

Newly Qualified Trade Mark Attorney, South, £60-£65,000

Join one of the most highly ranked trade mark teams in the UK, and work with a varied portfolio of sole inventors, SMEs and multinational conglomerates across a range of technologies. You will work closely with your clients on the initial creation and ongoing protection of distinctive brands, and advise them on international and commercial strategy. You will work both offensively and defensively on trade mark enforcement in the UK and overseas, and manage an extensive portfolio of prosecution, appeals and oppositions. The Trade Mark team is extremely visible in the IP world. It actively participates in a number of networking events and conferences, and provides lectures and presentations for the wider IP and legal industry, clients, and prospective new business.
