

“i still haven't found what i'm looking for”

**In-house Patent Attorney, Dyson, Electronics or Engineering**

Leading British institution, Dyson, has recently made heavy investment in their Research, Design and Development (RDD) projects and as a result, they are in need of an additional patent attorney to join their team. The role will involve a significant amount of drafting work and prosecution, competitor search and analysis, and the opportunity to provide strategic IP advice that could impact the future direction of the company. You will work closely with the RDD and product development teams, advising on IP issues right from the initial product conception through to its launch to market. The work is stimulating and challenging, and the environment is characterised by energy, enthusiasm and initiative.

**Qualified Trade Mark Attorney, North, c. £70,000**

Work in an established office with an impressive portfolio of clients, ranging from sole inventors, SMEs and start-up ventures, to leading household names. The new addition will support the Partners with the management of the office and assist with their client portfolio. They will also seek out and secure new business with the support of the dedicated marketing department. You will be responsible for managing your own practice, and duties will include advising on all aspects of trade marks issues. This could include copyright, common law, business/domain name and design matters, filing and prosecuting oppositions, and dealing with invalidity and revocation proceedings and appeals before the UKIPO and OHIM.

**Part Qualified/Finalist Patent Attorney, Electronics, London, £35-£55,000**

This firm's electronics department is in a fairly unusual position. They are growing quickly but they still have room for individuality. They have a broad scope of work mixed across international corporations, small and medium businesses and some highly complex cutting edge technology. They can offer more breadth of experience than a typical patent attorney role, with the potential to be involved in much more contentious IP work and possibly commercial IP such as licensing. They are small enough to be able to offer considerable flexibility in respect to how your career develops. But then they are large enough to work with some very exciting projects and have an extensive base of international contacts. Culturally they are unlike the vast majority of London firms so if you want something quite different from your existing environment they will have a great deal to offer.

**Foundation Level Trainee, Engineering/Electronics, London, £30-£35,000**

This firm is able to offer you the security that is only afforded by a reputation built through years of impeccable service but with an approach that views the IP profession through fresh eyes. They have been actively growing their team with additional members, as opposed to replacements, and are now in need of an experienced trainee to work within their Electronics or Engineering team (or both). The close knit working environment will allow you to gain early experience in all patent duties, including the drafting and prosecution of European, British and PCT patent applications; representing clients at the European Patent Office; offering strategic advice and managing highly valuable IP portfolios. Ideal candidates will have around a years' experience in the profession and will completing/completed the Queen Mary course or similar, although those with 6 months' experience plus will also be considered.

**Life Sciences Specialist, 3 Years' Experience +, North, £48,000+**

An established practice has recently taken on a new lease of life, and is looking to grow the Life Sciences team with the addition of a part or fully qualified patent attorney - ideally with a biotechnology background. You will advise universities, spin outs, SMEs and multinational household names in the pharmaceutical and biotechnology sector with respect to patentability, FTO, opposition/revocation and SPCs and work closely with them to ensure their patent portfolio is fully protected and commercially viable. Areas of expertise include, but are not limited to, cancer therapy and diagnostics; cardiovascular therapy; embryonic stem cells; immunology; transgenic plants; and tissue engineering.

**Finalist up to 2 Years' PQE, Chemistry, London, £50-£75,000**

This is a very exciting opportunity to join a firm with serious ambitions for its London operation. This role would really suit someone looking for variety of both technical and client work, and who enjoys some of the commercial aspects of the job. The firm offers genuine career advancement opportunities, and a fulfilling experience whilst achieving your goals. They are a leading name within the Intellectual Property sector, and their client base will allow you to be at the forefront of some of the most innovative developments in the chemical field. The firm's practice deals with a significant amount of oppositions and appeals work across the whole gamut of chemistry and pharmaceutical intellectual property.

**Senior Trade Mark Paralegal, Brussels**

Strengthen the already highly successful efforts of this IP administrative service provider by joining their newly established support team focusing on trade mark (and some patent) filing. You will be responsible for preparing a number of different documents, forms and reports for both external clients and the internal team of attorneys; performing document quality checks; and reporting on any upcoming forms, formalities and legal procedures that are required. This role requires candidates to have a certain level of managerial prowess due to it being an acting direct report for a number of junior paralegals, as well as having the responsibility for the ongoing training of support and administrative staff. It is anticipated that candidates will have circa ten years' experience working in a similar role, have experience corresponding with, coordinating and managing Intellectual Property Management Systems (IPMS), foreign filing agents and workflows across the globe.

**Qualified Patent Attorney, Electronics or Engineering, North, £67,000+**

A leading private practice has recently secured an impressive new client, and is looking to grow its electronics team with the addition of a qualified patent attorney as a result. There is an established portfolio for both direct clients and agency work, originating from the recently acquired client and also from the existing team. Responsibilities will include drafting and prosecution in the UK and Europe, as well as liaising with and instructing foreign agents on the protection of your clients' IP in jurisdictions overseas. You will be expected to work closely with your clients in the initial identification of IP, and provide ongoing strategic advice and support throughout the full IP lifecycle. Although business development is not essential in building your practice when you join (as it is already quite substantial), it is hoped that you will be comfortable assisting in the future acquisition of new clients to expand the team's fee earning capabilities.

**In-house Patent Information Specialist, South, c. £35,000**

This is an exciting opportunity for a patent searcher to join the IP Information group of a leading household name in the UK. The group is responsible for responding to search requests originating from both the Research Design and Development (RDD) and IP departments, and analysing technical information relating primarily to the company's products that are currently in development. You will also provide regular intelligence on competitor activity, safeguarding the protection of the company's IP portfolio, and ensuring that there is no infringement of third party IP rights. The role is a new addition to the team and has been created due to a heavy investment in the RDD department, both in terms of staff members and new product research, which has resulted in a significant increase in the amount of searches undertaken by the IP Information group.

**Patent Analyst/Searcher, South, £40,000+**

This firm has a solid presence in the South and handles a significant workload of contentious issues including EPO oppositions and litigation, as well as original drafting, prosecution and strong partnerships with foreign associates. They are looking to expand their highly specialised department with an additional patent searcher to work closely with the Partners and fee earning team to help identify possible obstacles regarding their client's IP portfolio, including existing competitor products and prior art. You will be responsible for the evaluation, classification and distribution of information in a variety of formats, as well as the preparation of clear and detailed summaries for further analysis. Additional duties will include carrying out audits and proactively providing presentations and individual consultations to staff members and external parties on patent and search analysis.

**Qualified (or Part Qualified) Patent Attorney, Biotechnology, Midlands, £70-£75,000**

Enjoy a varied work load that regularly challenges you and encourages you to continually build upon your skillset. Build relationships with large international corporations, as well as having the chance to develop a practice of sole inventors and start-ups offering the next technological breakthroughs in your field of expertise. Whilst the firm would ideally like to recruit a qualified attorney, able part qualified attorneys will also be considered. The firm are able to offer attorneys joining them a career path that will play to your strengths, given that they have enough flexibility for you to control how your position develops and the portfolio you will eventually be working with.

**Qualified Trade Mark Attorneys, Numerous Locations**

We have three active instructions for qualified trade mark attorneys across the country. We are working on two positions in the Midlands – one for a trade mark litigator and another for a good all-rounder. There's good scope for development as the department is expanding rapidly. We also have a position in London for a newly qualified attorney to join a major firm. This could be a significant development in your career, and could help you to swiftly build your profile in the profession. More details on each position can be found on the jobs section of our website.

**Newly Qualified Patent Attorney, up to 4 Years' PQE, Telcos/Semiconductors, Midlands, £65-£80,000**

This firm has a solid reputation built on years of exceptional service and industry leading knowledge and expertise. A recent internal structure shift has created the opportunity for an experienced patent attorney to join them in a position of significant responsibility, and to help manage their growing work load. Your average day will be reasonably varied, with a mixture of drafting and prosecution; strategic meetings with new and existing clients; oppositions and appeals; and more contentious work such as infringement, invalidity and revocation disputes. Career progression is fairly transparent, with clear targets set to help you up the ladder. Furthermore, recent additions have allowed for a mixed Partnership, which now includes both a modern and more traditional outlook.

**Junior Sales and Marketing Manager, IAM Software, London, £33,000+**

A rapidly growing market leader in intellectual asset management software is keen to continue their success with the appointment of a junior sales and marketing professional. You will be responsible for representing the brand at industry events and educating potential clients on the multiple services that are on offer. You will be present for the full sales life cycle, from the initial identification of potential new business and cold calling through to in depth product demonstrations and the ongoing support once the service has been implemented into the client's environment. It is hoped that you will have experience of both the Intellectual Property profession and software sales; however those with knowledge of one or the other will also be considered.
