

We'll help you fit in...

...even if fitting in means standing out

Qualified (or Finalist) Patent Attorney, Biotechnology, East Midlands, Finalist c £50,000/Qualified £65,000+

This firm's biotechnology operation is one of the largest in Europe and benefits from a highly skilled team of practitioners with an array of technical and commercial experience to hand. As experts in their dedicated field, the team's attorneys are able to offer the full spectrum of biotechnology patent work, focusing on technical areas ranging from cell biology and protein engineering through to immunology and beyond. You will be working with a top class client portfolio, which includes multinational household names, innovative start-ups and SMEs. This is a brilliant opportunity to join a top tier firm, renowned and respected for the excellent standard of service they provide to their clients.

Part/Newly Qualified Patent Attorney, Engineering or Electronics, Bristol, c £37,000/£60,000+

A brand new position has been created to help manage the growing work load of this highly regarded firm. Clients span across a range of industries including road, rail and marine; aerospace and defence; packaging; engineering materials; housing; and construction. They have an international focus, advising leading names in the US, Japan and Australia, as well as start-up companies, sole inventors and academic institutions across the UK and in Europe. The practice benefits from a team with exceptional academic records and who originate from a whole host of technical backgrounds, including mechanical and electrical engineering, materials science, aeronautics, physics and civil engineering. You will be responsible for all patent duties, as well as more strategic and commercially focused tasks such as advising technology transfer companies, speaking at industry events and managing the firm's relationships with industry organisations.

Designs Specialist Patent Attorney, London

This position is a bit of a rarity. It would suit an attorney who likes the idea of working across a broad range of technical areas, alongside both solicitors and patent attorneys, and who wants a mix of contentious and non-contentious work. The position's focus is on registered designs, allowing you to become a resident expert on all aspects of protecting designs and build upon the know-how you already have. You will work across a variety of scientific areas and have the opportunity to shape the role somewhat to suit your interests, whilst benefitting from a highly supportive firm infrastructure. Ideally, you'll be a qualified patent attorney with a technical background in the electromechanical field, or perhaps a solicitor or overseas qualified attorney with the requisite academic background in an electromechanical discipline and experience of protecting designs.

Finalist Patent Attorney, Chemistry, London, £50-55,000

Work with a broad spectrum of subject matter including (but not limited to) pharmaceuticals, oil and petrochemical technologies, catalytic processes, food chemistry, cosmetics and nanotechnology. The successful candidate will have access to a first class support network and will work with Partners who are highly visible within the profession, allowing for excellent exposure and ample networking opportunities. This is a unique chance to join a firm that is creative, forward thinking and highly respected within the profession. The varied and interesting portfolio of work on offer will allow you to challenge yourself professionally and develop your skills and expertise with the support of pioneers in the field. The working environment is open and refreshing, and hard work is rewarded with a clearly defined path to career progression, flexibility, and an excellent bonus scheme.

Opportunity for Engineers, South

Due to an influx of work, a highly regarded top tier patent and trade mark firm are now seeking to further grow their engineering practice with the appointment of an industry specialist. The firm are one of the largest in Europe and their success can be accredited to the highly skilled individuals that they attract to work for them, as well as the commercially minded and forward thinking approach that they strive to uphold. You will be joining a team of experts in their chosen field and will have the chance to work across the broad spectrum of engineering subject matter ranging from civil engineering and marine engineering, through to medical devices and nano-engineering. What's more, the firm have a strong track record of working with contentious issues including EPO oppositions and litigation, and as a result they have cemented strong relationships with associates overseas.

Part Qualified Patent Attorney, Electronics, London, £35,000+

Work alongside a truly committed team of professionals and help implement an extremely well thought out and detailed development plan in order to continue the firm's ongoing success. Responsibilities will include travelling to and meeting with clients to discuss the management and strategic development of their IP portfolio; highly detailed drafting work with current and future competitor activity in mind; high profile opposition and litigation; and participation in local and international networking and industry events. The firm is run incredibly well, with a commercial focus and sound business ethos, benefiting both the staff and its clients. This is a fantastic opportunity to join a firm with a rich history, which is constantly growing, and which is capable of tailoring its approach to suit the constant changes within the industry.

Recently Qualified Chemist, South, £60,000+

The current chemistry team of this private practice handles a large volume of direct client work, covering a wide variety of subject areas such as medical devices, polymers, petrochemicals and pharmaceuticals. You will be responsible for providing an excellent service to the existing client base and for growing the practice further, through attending networking events and securing potential client meetings. You will be on hand to assist every stage of the patenting process, including the identification and drafting of inventions, through to the prosecution of applications both in the UK and overseas. Contact with local attorneys outside of Europe will also be required, in order to prosecute patent applications internationally. This is an exciting opportunity to grow and manage your own client portfolio in a firm with a strong reputation for excellence. The environment is both supportive and progressive, and will offer the successful candidate a real opportunity to develop and excel.

Finalist/Recently Qualified Patent Attorney, Electronics, London, £50-65,000

You will be joining this firm's highly reputable engineering and electronics practice, working alongside a number of industry leading experts who are at the forefront of the profession. The team has an open and collaborative ethos, and they will offer the successful candidate an excellent support network and a brilliant opportunity for professional development. You will work directly with an array of UK and international clients including multinational corporations and household names, world class universities and research institutions, SME's, and sole inventors. You will also handle a broad range of innovative technologies including software related inventions and telecommunications, through to optical recording media, avionics, air conditioning technologies and beyond.

Partner, Electronics/Engineering, London, Excellent

This highly commercial and progressive private practice aim to expand their current partnership via the appointment of a new Salaried Partner as part of their ongoing development plan. The position will offer an even mix of agency and direct clients across an array of exciting technologies, ranging from computer hardware and nanotechnology through to sub-sea drilling, mobile technologies, high volume production processes/machinery, and beyond. Salaried Partners are active members of the firm's management structure and are heavily involved in the firms overarching strategy as well as driving training and business development initiatives. Whilst a client following is not required, suitable candidates will need to demonstrate an aptitude for business thinking, management and networking.

Finalist/Newly Qualified Patent Attorney, Biotechnology, London, £50-67,000

Join a firm with an incredibly diverse biotechnology practice and work with a variety of specialisms, ranging from plant biology to immunology and personalised medicine. From day one, you will be responsible for the ongoing provision of excellent services to a wide array of clients through both direct client contact and agency work. You will be involved with all stages of the patenting process, from the identification and drafting of inventions, through to the filing and prosecution of applications both on a national level and worldwide. The firm offers a highly supportive environment with regular assistance provided by both the firm's Partners and a team of highly skilled clerical staff, ensuring the candidate's successful integration and ongoing development.
