

Beryl wasn't going to let anything get in the way of her dreams.

Including Albert

Attorney, Electronics (Newly Qualified), London, £67,000+

Join an open and collaborative environment where the sharing of ideas across all operational levels is greatly encouraged. You will be working alongside a prominent and highly regarded Partner, across a stimulating mix of technical subject matter; including but not limited to robotics, bio-informatics, communications, display and optical technology, clean technology, materials and nanotechnology, and medical devices. You will need to be a client focused and hands on attorney, who is commercially minded and able to think strategically. For those being welcomed into the firm, there is a visible path through to Partnership on offer, as well as an environment in which hard work and success will be duly rewarded. Successful candidates will ideally be at newly qualified level, however those with more experience may also be considered.

Attorney, Biotechnology (Newly Qualified), London, £60,000+

The biotechnology practice at this firm is at the cutting edge of the profession, due to the industry leading experts that operate within it. Your work load will be as diverse as it is international, with access to an engaging portfolio of work and the opportunity to deal with a significant amount of contentious issues, such as EPO oppositions and litigation. Furthermore, you will be working alongside attorneys with a wealth of contacts and practical experience gained from their time spent working in a variety of roles, including in-house at blue chip organisations and at well-known academic institutions. This is an exceptional chance to join a firm that is consistently rated as top tier by a number of legal directories. You will be welcomed by an interdisciplinary and open culture, in which collaboration and the sharing of knowledge is of a paramount importance. The firm is keen to hear from candidates who have recently qualified, although those with additional PQE may also be considered.

Attorney (Finalist Level), Engineering, Midlands, c. £55,000

Cover a broad range of technical subject matter, from aeronautical engineering to automotive, clean tech, medical devices, and materials. The firm's work portfolio is impressive and they pride themselves on the bespoke service that they provide their clients, which range from large corporations to start ups and SMEs. The team's Partners have extensive experience of prosecuting patent applications before numerous patent offices via foreign agents, as well as directly representing prestigious clients in the UK and at the EPO. This an excellent opportunity to join an aspirational tier one firm with a brilliant track record of promoting their attorneys through to Partnership. Their offices are open and modern, as is the firm's philosophy.

Electrical Engineering, PQ Patent Attorney, South West, £40,000+

Work alongside a truly diverse team of professionals with backgrounds including in-house, the UK IPO, and the R&D departments of some of the world's leading names in the electrical engineering field. You will be joining one of the largest and busiest practices in Europe with the opportunity to work closely with clients in the UK, US and Asia. Responsibilities will include travelling to and meeting with clients to discuss the ongoing management and strategic development of their IP portfolios; highly detailed drafting work with current and future competitor activity in mind; high profile opposition and litigation; and participation in local and international networking and industry events. The firm is run incredibly well, with a commercial focus and sound business ethos benefiting both staff and clients alike. You will be encouraged to take an interest in all areas of the business and help contribute to decisions that will shape the future direction of the firm as a whole. This is a fantastic opportunity to join a firm with a rich history, which is constantly growing, and which is capable of tailoring its approach to suit the constant changes within the industry.

Attorney, Electronics, South West, c. £80,000

Work in a progressive environment and directly interact with a first class client base, with a whole host of cutting edge technologies at your disposal. The individual technical teams within the firm adopt a strongly collaborative approach, working closely with colleagues and clients alike. The successful candidate will be working in the highly diverse electronics team with technologies including wireless space and 3G mobile technology radio protocols; next generation communication methods; telecommunications; video and audio signal processing; computer technology; and e-commerce. There is never a dull moment, with attorneys constantly engaging with their clients by offering frank and realistic advice in relation to their existing IP protection, potential growth areas for their portfolios, and the commercialisation and enforcement of rights.

Fantastic Opportunity for Senior Associates in London

We're working with an extremely prestigious and well known private practice looking to recruit a number of senior associates across all of their specialist teams. This opportunity would really suit an individual who may currently feel overlooked for Partnership, is a small (but extremely capable) fish in a large pond, or someone who is perhaps struggling to be heard over their more vocal colleagues. This firm is not afraid to advance those who deliver and ensures that all of their attorneys have the necessary guidance and tools to help them along their way. They have a successful track record of welcoming lateral hires and have the client base and reputation in order to comfortably accommodate them. The firm does not shy away from business development. They're constantly evolving and are looking for candidates who will help them shape their ongoing development.

Attorney (Part Qualified), Software, Yorkshire, c. £43,000

This firm has struck an excellent balance between a modern and forward thinking working environment and the reputation and client base that only a long standing and consistently successful firm can hold. The innovative IT infrastructure allows for flexible remote working and communication across the offices, as well as a paper-lite office and a huge peer and Partner led support structure. The firm is not afraid to put you in front of clients from early on and believes that your development within the firm, and career, is achieved through a combination of both experiential learning and academic study. Career progression is openly discussed and you will be made fully aware of the steps you need to take in order to achieve it.

Finalist or Qualified Patent Attorney, Chemistry, South, c. £50,000/£65,000+

Enjoy a truly interesting range of clients, from multinational blue chip organisations through to sole inventors, SMEs, and prestigious academic institutions. The chemistry team are regularly regarded as the first point of call for leading clients in the field and are known for providing exceptional advice and support in the ongoing protection of their IP portfolios. The group's members are experts in their technical field and have extensive experience of successfully managing complex contentious issues before the EPO, as well as a number of national offices and courts. Their excellent subject knowledge puts them in a strong position both to ensure that the commercial potential of their clients' inventions are acknowledged and met, and to offer expert advice regarding clients' future innovation plans.

For more information or to apply to any of these roles speak to Pete Fellows, Phillipa Holland or Louisa Stokoe on **020 7903 5019** or email: **contact@fellowsandassociates.com**.
