## Gill Jennings & Every LLP

INTELLECTUAL PROPERTY

### Finalist Level Patent Attorney, Electronics/Physics, London

Gill Jennings & Every is a leading patent and trade mark firm which is consistently acknowledged for the high calibre of support and advocacy that it provides to their world class clients. The firm's working environment is one that is both stimulating and collaborative, in which your ideas will be listened to regardless of your level of seniority. Attorneys at Gill Jennings & Every are actively encouraged to be client facing and commercially minded. Client care is regarded as crucial to the ongoing success and reputation of the firm, and as a result you will need to be relationship driven, a strong communicator, and not afraid of developing complex IP strategy in collaboration with colleagues, clients and external counsel. The support on offer will be second to none, with an open door policy allowing you to discuss cases with Partners and senior associates. This is an exceptional opportunity to gain a good mix of direct client and agency work experience in a firm where your ideas and input will be truly valued.

### Qualified Patent Attorney, Chemistry, London

This firm has an outstanding reputation for providing commercially sound advice to their clients, and an equally strong track record when representing them at proceedings in the UK and Europe. The team employs a relaxed and collaborative working approach, where attorneys are encouraged to make their own business decisions and who are given an enormous amount of opportunity from early on. The practice has strong connections with European clients and associates, allowing for an interesting European twist to your portfolio, and you will be working alongside a Partner who is recognised regularly for their excellent technical ability and ability to effectively support and delegate to his team. You will be responsible for a good mix of drafting and prosecution work, as well as some oppositions and appeals, and you will be given the chance to provide strong commercial support to a variety of innovative clients; from SMEs to multinational corporations based in the UK, Europe and internationally.

### Part Qualified/Finalist Level Patent Attorney, Electronics/Engineering, Bath

An expanding firm is looking to grow their team with a part qualified or finalist level patent attorney to help manage their ever increasing client portfolio. The variety of work on offer is incredibly diverse and covers a broad spectrum of stimulating technical subject matter. It will allow the successful candidate to tackle a much more commercially focused range of work, including IP capture, strategic advice and analysis, as opposed to just drafting and prosecution. Client satisfaction is at the forefront of the firm's ethos, as is departmental connectedness and the provision of an open and supportive working environment. For those in the early stages of their career, there is a strong support structure in place whilst sitting their qualifying examinations. This is a unique opportunity to join small yet dynamic firm which can offer a brilliant work life balance, as well as a great deal of transparency with regards to salary and career progression allowing for a clearly defined and structured career path.

### Recently Qualified Patent Attorney, Generalist Engineer, Bristol

Work with an internationally focused portfolio advising leading names in the US, Japan and Australia, as well as start up companies, sole inventors and academic institutions across the UK and in Europe. The practice benefits from a team of attorneys with exceptional academic records, who originate from a whole host of technical backgrounds including mechanical engineering, materials science, aeronautics, physics and civil engineering, and who have worked in industry, at the UK IPO and at leading IP firms from across the world. You will be responsible for completing all general patent duties, as well as more strategic and commercially focused tasks such as liaising with and advising technology transfer companies, speaking at industry and academic events, and managing the firm's relationships with industry organisations. Ideal candidates will be comfortable working across a range of engineering technologies and will have recently qualified as a patent attorney, although candidates who have yet to qualify but have completed the Queen Mary will also be considered.

### Finalist Level Patent Attorney, Mechanical Engineering/Electronics, London

Cleveland IP is an innovative patent and trade mark firm with an impressive track record within the industry. The successful candidate will have the chance to carry out substantial direct client work, both domestic and international, and have ample opportunity to meet interesting and innovative clients face to face. You will provide tailor made advice regarding the protection of your clients' IP portfolios across a range of interesting subject areas which will, depending on your technical skill set, include radar and sonar; mass spectrometer machines; defence technology; consumer electronics; medical devices; software; and test instrumentation. Cleveland's attorneys are well connected and active members of the IP community, and are encouraged at all levels to carry out business development activities such as attending networking events, exhibitions and conferences in the UK and overseas. This is an excellent chance to join a firm that is ambitious in a measured way, and where significant value is placed on a healthy work life balance.

### Qualified Patent Attorney, Electronics, Scotland

There is a well balanced mix of interesting local clients, plus wide ranging and dynamic international corporations available at the Scottish base of this leading firm. Build relationships with SMEs and universities and help develop and organise their IP strategies. This includes IP capture, the drafting, filing and prosecution of patent applications both within the UK and Europe, as well as coordinating a network of associate attorneys internationally. The firm really likes commercial people, in other words attorneys who like to work closely with their clients and help develop an effective methodology for working through IP issues. The practice has grown rapidly in the region and it is certainly an excellent time to be part of that growth with unbound career potential. They have a great deal of existing work but you will also be given the opportunity to aid with the acquisition of new clients. The firm has a world class support infrastructure and you will benefit from a highly collaborative culture and backing from both Partners and an experienced paralegal team.

### Newly Qualified Patent Attorney, Biotechnology, London

Enjoy an extremely diverse and international work load with clients ranging from innovative UK based sole inventors and SMEs through to large international corporations. You will have access to an engaging portfolio of work and have the opportunity to carry out a significant amount of contentious work, such as EPO oppositions and litigation. Furthermore, you will be working alongside attorneys with a wealth of contacts and practical experience gained from their time spent working in a variety of roles, including in-house at blue chip organisations and at well known academic institutions. This is an exceptional chance to join a firm that is consistently rated as top tier by a number of legal directories. You will be welcomed by a multidisciplinary and open culture, in which collaboration and the sharing of knowledge is of a paramount importance.

### Part Qualified Patent Attorney, Engineering, London

Join the extremely specialised and successful engineering team of this leading patent and trade mark firm in London. You will be working with a range of engineering technologies and handle a balanced mix of agency and direct client work, with strong relationships established with a range of clients across the UK, Europe and overseas. This is a fantastic opportunity for a patent attorney early on in their career, who may have realised that their current working structure, work load and client mix, or perhaps even the team dynamic is not for them. The firm offers a fantastic training scheme and has a solid track record for supporting their attorneys through UK and European qualification. They are strong believers in experiential learning and encourage their attorneys to become involved in business development, client contact and the more strategic areas of the business from day one.

For more information or to apply to any of these roles speak to Pete Fellows, Phillipa Holland or Louisa Stokoe on 0207 903 5019 or email: [contact@fellowsandassociates.com](mailto:contact@fellowsandassociates.com).
