

# “The man who has no imagination has no wings.”

- Muhammad Ali

#### Electronics, Part/Recently Qualified Patent Attorney, South West

This dynamic firm is looking to expand their team as a result of their ongoing success. This is fantastic opportunity to join a forward thinking environment and benefit from high quality direct client interaction, as well as an excellent work life balance. The work on offer is diverse and will allow the successful candidate to tackle a commercially focused range of tasks including IP capture and strategic advice and analysis, as opposed to just drafting and prosecution. Client satisfaction is at the heart of the firm's ethos, as is the provision of a supportive and inclusive working environment in which departmental integration is greatly encouraged. You will be afforded ample opportunity for professional development through attendance at CPD and networking events, and will have access to a strong support structure if you're still sitting your qualifying examinations.

#### Cambridge Opportunity, Finalist Level Patent Attorney, Electronics

Join a top tier firm and take a truly hands on approach to your client work. In addition to supporting the existing client portfolio, there will be the opportunity to acquire and manage your own practice to reflect your own technical strengths and interests. Alongside the drafting and prosecution of patent applications, you will play a vital role in the development of your clients' IP strategy through IP capture, opinion and advisory work. There will also be ample opportunity to liaise with and instruct foreign associates from across the world through agency assignments, assist in-house and external solicitors with litigious matters, and get involved in business development in collaboration with the firm's dedicated marketing department. The successful candidate will be given all the help they need to develop and progress, with the support of industry leading Partners and a highly effective clerical and administrative function.

#### Electronics, Finalist/Recently Qualified Patent Attorney, London

This firm is regularly acknowledged for the high quality commercial advice and advocacy that it provides to its world class client base. Based at the firm's modern London offices you will be part of an environment that is stimulating and collaborative, and above all meritoric. To succeed in this role you will need to be relationship driven and a strong communicator, as client care is regarded as crucial to the ongoing success and reputation of the firm. As you progress you will be afforded the flexibility to shape your practice to suit your own strengths and interests, supported throughout by an open door policy and a Partnership with industry contacts that are second to none. This is an excellent opportunity to be involved in high value work across a range of cutting edge technologies including telecommunications, avionics, optical recording media and software. Your hard work and success will be rewarded by a clear and transparent path through to Partnership, as the firm has a clear growth plan in mind and is looking for ambitious candidates who want to be part of it.

#### Finalist/Recently Qualified Patent Attorney, Electronics, London

Enjoy an innovative environment in which your exposure will not be defined by your years of experience. There will be an excellent mix of oppositions and appeals, as well as infringement and validity opinion work across a number of technologies including electronics, optics, software and computer related inventions. You will also have the chance to gain significant exposure to litigation work, and will be given the opportunity to take the CIPA Litigation Skills Course if you haven't already done so. The firm encourages its attorneys to get involved in the marketing and business development of the practice from day one via the attendance of industry events and networking receptions, which is often not normally afforded at this level. Furthermore you will be given the responsibility for supervising and supporting more junior members of staff through knowledge sharing and collaborative working. This is a truly unique opportunity to progress through to Partnership quicker than is often the norm, within a firm in which your ideas and input will be valued regardless of your level of seniority.

#### Engineering, Part Qualified/Finalist Level Patent Attorney, London

Work alongside an experienced senior associate and begin your training as the firm's future generation of Partner. You will be working closely with clients across a range of subject areas such as road, rail and marine engineering; medical devices; construction; manufacturing; oil and gas; electro mechanical devices; and computer implemented control systems. The firm places a great importance on maintaining and establishing strong relationships with clients in the UK, Europe and internationally, and there will be a good mix of agency and direct client work on offer. The training provided is second to none, and those working towards qualification will receive a great deal of support throughout the process. The firm takes a hands on approach to learning and encourages involvement in business development, business strategy, and client contact from day one. The role would be suitable for candidates with around 1 year's experience in the industry through to finalist level. Although not compulsory, a fluency in French would be highly desirable due to the origin of much of the client work.

#### Attorney Opportunities in the West Midlands

As a result of their continued success, a leading firm with an outstanding reputation have a number of opportunities available for patent attorneys across a range of technical specialisms. You will be responsible for providing an excellent service to existing clients as well as the acquisition of new ones, allowing for a substantial amount of direct client work. You will deal with the entire patenting process from the identification of inventions and drafting through to the prosecution of applications in the UK and overseas, and will have the chance to liaise with attorneys outside of Europe in order to prosecute patent applications internationally. This is a fantastic opportunity to grow and manage your own client portfolio in a firm that is highly regarded worldwide. The firm is progressive and above all supportive, offering an excellent environment in which to develop and excel. Candidates from part qualified level through to c. 4 years' PQE, with a technical background in chemistry, electronics or engineering will be considered.

#### Chemistry, Qualified Patent Attorney, London

Benefit from a team environment that is both collaborative and relaxed, and enjoy a good mix of drafting and prosecution work as well as oppositions and appeals. You will have the opportunity to provide sound commercial support to a range of innovative clients internationally - from SMEs to multinational corporations. Working alongside a Partner who is recognised regularly for their excellent technical ability and first class client portfolio, you will cover a number of stimulating technical areas including but not limited to petrochemicals, beauty products and household chemicals. This firm has an impressive track record when representing their clients at UK IPO and EPO proceedings and its attorneys have strong connections with European clients and associates, allowing for an interesting European element to your work. To be successful in this role, candidates will need to be hands on, commercially driven and comfortable working in a client facing role from day one.

#### Bristol Opportunity, Part/Recently Qualified Patent Attorney, Engineering

Take an international approach and join a firm renowned for advising leading names in the US, Japan and Australia, as well as start-ups, sole inventors and leading academic institutions. The team has an exceptional academic record originating from a range of backgrounds, including mechanical engineering, materials science, aeronautics, physics and civil engineering. The work on offer is highly varied, spanning a range of sectors including road, rail and marine; aerospace and defence; packaging; engineering materials; housing; and construction. You will have the opportunity to be involved with the whole spectrum of patent duties, as well as more strategic and commercially focused tasks such as speaking at industry and academic events, advising technology transfer companies, and managing the firm's relationships with industry bodies.
