

“What if we don't change at all ...
and something magical just happens?”

Trainee Trade Mark Attorney (1 Yr.'s Exp to 1 Yr Post QM), Manchester

Part Qualified Patent Attorney, Engineering, London

We have a fantastic opportunity for a patent attorney early on in their career, who may have realised that their current working structure, work load and client mix, or perhaps even the team dynamic is not for them. The firm offers a fantastic training scheme and has a solid track record of supporting their attorneys through UK and European qualification. They are strong believers in experiential learning and encourage their attorneys to become involved in business development, client contact and the more strategic areas of the business from day one. Ideal candidates will have around a year's experience with a strong academic background in mechanical engineering, although other areas of engineering may also be considered. French language skills are desirable but not compulsory in order to apply.

Finalist Level Patent Attorney, Electronics, London

This firm is consistently recognised for the extremely high level of service it provides to its world class clients; offering innovative and commercially sound solutions which effortlessly protect their clients IP both in the UK and overseas. The working environment is both stimulating and collaborative, in which ideas are listened to regardless of the level of seniority and where hard work is regularly acknowledged and generously rewarded. There is a healthy mix of direct client and agency work waiting for you, as well as ample opportunity to grow your own portfolio through hands on business development and the chance to tailor your practice to suit your strengths and interests. The support on offer will be second to none, with an open door policy allowing you to discuss cases and work closely with Partners and senior associates across all of the highly technical teams.

Opportunities for Patent Attorneys in the Midlands, All Specialisms

Newly Qualified (up to 2 Yrs' PQE), Chemistry, London

Join a team environment which is supportive, collaborative and relaxed, and work alongside a Partner who is recognised regularly for their excellent technical ability and first class client portfolio. The practice has strong connections with European clients and associates (meaning your work load will contain an interesting European element) and deals extensively with prosecution and litigation in a wide variety of technical areas, including pharmaceuticals, cosmetics, agrochemicals, foodstuffs, photochemistry and polymers. You will also be responsible for a good mix of drafting, opposition and appeals, and will be given the chance to provide strong commercial support to a variety of innovative clients; from SMEs to multinational corporations based in the UK and internationally.

Part Qualified Patent Attorney, Electronics, London

Qualified Patent Attorney, Electronics, London

Work with some of the most successful practitioners in the sector with a wealth of collective experience across the entire spectrum of patent work; from strategic prosecution and due diligence, through to litigation and complex oppositions both in the UK and overseas. You will be working alongside a prominent and highly regarded Partner managing substantial patent portfolios for multinational corporations, as well as taking a more hands on approach when advising start-ups, sole inventors and growing companies on their IP strategy. The firm encourages their attorneys to adopt a healthy work life balance and ensures everyone has access to the support they need with an open door policy at all levels and a transparent appraisal scheme. Technologies will include semiconductor process and integrated circuit technologies; electrical and electronic technology; metrology; consumer products particularly domestic appliances and personal care; computer architecture, network and communications technology; and medical and dental device technology.

Qualified Trade Mark Attorney, Manchester

Part Qualified Patent Attorney, Mechanical Engineering, South West

Recently Qualified Patent Attorney, Electronics/Electrical Engineering, South West

Enjoy a progressive environment and benefit from first class direct client interaction, with regular face to face meetings across the UK and internationally. The individual technical teams within the firm adopt a highly collaborative approach, working closely with colleagues and clients to ensure the best possible outcome is achieved. There is never a dull moment, with attorneys constantly engaging with their clients and offering frank and realistic advice in relation to existing IP protection, potential growth areas for their clients' portfolio, commercialisation and enforcement of rights. Duties will include the drafting and prosecution of patent applications; advising on infringement, validity and freedom to operate issues; as well as the opportunity to become involved in complex patent litigation cases across the UK, Europe and the US.

Qualified Patent Attorney, Biotechnology, London

Become a strategist, advisor and advocate for some of the top ten biotechnology companies around the world. You will be joining a practice with a stellar reputation and a refreshing dynamic approach, and where the focus is on delivering an extremely high quality of service to its clients. You will be responsible for shaping and implementing your clients' IP programmes across Europe and will enjoy significant opposition and litigation cases, strategic prosecution, and high value due diligence work. The practice operates a working environment in which influence originates at all levels, and where those who achieve will be very well rewarded. There is demonstrable career progression through to Partnership and access to some of the best clients and attorneys around. This is an opportunity not to be missed for those with the ambition and drive to excel.

Finalist Level Patent Attorney, Chemistry, South
