

#### **Newly Qualified Patent Attorney, Electronics/Engineering, Birmingham**

Benefit from an environment that is both challenging and ultimately rewarding, and where a great deal of importance is placed on connectedness between the different offices, both in the UK and overseas. Regular communication with colleagues is encouraged with attorneys at all levels sharing ideas and working collaboratively on portfolios of work which are both stimulating and impressively diverse. Due to the size of the firm there is more than enough work available to accommodate your individual expertise, giving you the opportunity to tailor your practice to suit your interests as your role develops and explore areas beyond your own technical specialism. You will be offered ample opportunity for overseas travel in order to meet with clients and associates, and attend industry conferences and events. Secondment to one of the firm's other offices is also wholly achievable, be it in the UK, Europe or further afield.

#### **Newly Qualified Patent Attorney, Electronics/Engineering, Manchester**

#### **Part Qualified or Finalist Level Patent Attorney, Chemistry, London**

This firm are consistently noted for the exceptional support and advocacy they provide their clients internationally, who range from multinational corporations to leading universities and innovative SMEs. Be welcomed into a friendly and supportive team, including some of the industry's most respected experts with a diverse and interesting collective knowledge base. Alongside carrying out the broad spectrum of patenting duties, you will also be responsible for advising clients on their wider IP strategy including the maximisation of the commercial potential of their IP. This is a brilliant opportunity to join a firm who place a great deal of importance on the provision of personalised training and ongoing development, as well as ample opportunities for progression. In turn for your hard work, you will be rewarded with a clear path to Partnership as well as access to a competitive and wholly achievable bonus scheme.

#### **Finalist Patent Attorney, Biotechnology, London**

#### **(Very) Newly Qualified Trade Mark Attorney, South Coast**

Be part of a team that is consistently recognised by the Legal 500 for providing an impeccable service to their clients, and work alongside attorneys who are well known in the industry for their commitment and passion for quality and innovation. The trade mark team work with a diverse range of clients from individuals and SMEs to blue chips and multi-national corporations, who originate from a whole host of industries including entertainment; tourism; finance; fashion and beauty; medical technology; publishing; food and beverage; and engineering. They invest heavily in their visibility, with attorneys encouraged to actively network, speak at conferences and contribute to firm/industry publications. You will be responsible for handling all aspects of trade mark work and be expected to work closely with your clients, guiding them through each stage of the process and offer commercially sound and pragmatic advice to ensure they are fully protected against any eventuality.

#### **Renewals Administrators, Scotland**

#### **Part Qualified/Qualified Patent Attorney Mechanical Engineering (or Physics), Bristol**

Handle a truly mixed bag of work which includes negotiation of settlement agreements; competitor portfolio and product analysis; due diligence; invention harvesting; creation and implementation of client IP policies at Board level; provision of IP training to managers and engineers; infringement and validity advice; freedom-to-operate opinions; and drafting and prosecution. Client satisfaction is at the forefront of the firm's ethos, as is departmental connectedness and the provision of an open and supportive working environment. The firm offers its attorneys a great deal of room for professional development and the opportunity to attend a number of CPD and networking events. For those in the early stages of their career, there is a strong support structure in place whilst sitting their qualifying examinations. For qualified attorneys there is a very meritocratic structure ensuring that progression towards Partnership is both achievable and transparent.

#### **Newly Qualified Trade Mark Attorney, London**

#### **Part Qualified Patent Attorney, Engineering, London**

Work alongside a well-respected and experienced Senior Associate and begin your training as the firm's future generation of Partner. There is a good mix of agency and direct client work, with a strong emphasis on close relationships established with clients across the UK, Europe and overseas. This is a fantastic opportunity for a patent attorney early on in their career, who may have realised that their current working structure, work load and client mix, or perhaps even the team dynamic is not for them. The firm offers a fantastic training scheme and has a solid track record for supporting their attorneys through UK and European qualification. They are strong believers in experiential learning and encourage their attorneys to become involved in business development, client contact and the more strategic areas of the business from day one. Ideal candidates will have around a year's experience with a strong academic background in mechanical engineering, although other areas of engineering may also be considered. French language skills are desirable but not required in order to apply.

#### **Finalist Level Patent Attorney, Electronics/Engineering, Birmingham**

#### **Finalist Patent Attorney, Electronics/Physics, London**

Client care is regarded as crucial to the ongoing success and reputation of this firm, and as a result you will need to be relationship driven, a strong communicator, and not afraid of developing complex IP strategy in collaboration with colleagues, clients and external counsel. The support on offer will be second to none; with an open door policy allowing you to discuss cases with Partners and senior associates. Working alongside an experienced Partner with excellent contacts in the industry and strong experience of handling contentious and high value issues at the EPO, you will have the chance to work with a range of cutting edge technologies including telecommunications, avionics, optical recording media and software. This is an exceptional opportunity to gain a good mix of direct client and agency work experience. Your ideas and input will be truly valued, in a firm where trainees and qualified attorneys are allowed to take ownership of their own work.
