Attorney, Finalist Level, Chemistry, Cambridge

Enjoy a varied client base consisting of a good number of large international companies as well as small to medium enterprises - in particular, pharmaceutical businesses looking to develop their IP business strategy. You will be given a great deal of responsibility and the opportunity to develop your career in a way that suits your interests; there is enough range and depth of work to accommodate a wide range of pursuits. The role will encompass the full range of patent activities including drafting, filing and prosecution, oppositions and appeals before the EPO, and contentious advisory work. You will also be encouraged to develop your client skills through business development initiatives and attendance at networking events, as well as delivering seminars and participating in working groups. The firm are in an exciting phase of their development with significant plans for the future, and as a result are commercially aware, very well led and offer significant opportunities for career growth.

Birmingham, Qualified Patent Attorney, Electronics or Engineering

Work on a portfolio that is both stimulating and impressively diverse, and have the opportunity to cover the broad spectrum of patent duties from drafting and prosecution, through to oppositions and appeals. You will also be responsible for the provision of sound commercial advice to clients including sole inventors, academic institutions and multinational companies. This is an excellent opportunity to accelerate your career within a firm with a global presence, where you will play an important part in the firm's wider management and business strategy and be afforded a high level of autonomy to build and manage your own client portfolio. The firm offer a clearly defined path through to Partnership, as well as a benefits and salary package currently above market average. Ideal candidates will be newly qualified with up to 2 years' PQE, and a strong academic background in electronics, engineering or similar.

Head of Operations – Intellectual Property Annuities and Renewals, Glasgow

Envoy are specialists in global IP annuities and renewals. Founded in 2008, Envoy's customers now stretch across 40 countries. Their clients include renowned patent and trade mark

firms, global law firms, universities and blue chip corporations. The Head of Operations is a key leadership role reporting directly to the CEO. The position has three key components: 1) Operations – having primary responsibility for the renewals and annuities business. Being able to streamline and refine processes, assess risks and develop systems to support a significant predicated growth in the client base and build excellent working relationships with both clients and suppliers. 2) Team Management – developing, training, recruiting and supporting a large team of IP administration professionals with a wide range of experience from very new to the industry to those with extensive expertise. 3) Deputising for the CEO in key areas of business, being able to make complicated corporate decisions when he is unavailable and being prepared to be responsible for the results of those decisions. Suitable candidates are likely to have: previous Intellectual Property administration experience; previous experience managing a team; presentation and client communication skills and the confidence and ability suited for a leadership role.

Chemistry, Finalist Level Patent Attorney, London

Handle direct client work covering a wide variety of subject areas such as medical devices, polymers, petrochemicals and pharmaceuticals. You will need to be able to demonstrate a strong academic background in chemistry and a confidence in working across a broad spectrum of chemical specialisms. The role has a great deal of depth across the patent process including the identification and drafting of inventions, through to the prosecution of applications both in the UK and overseas. Contact with local attorneys outside of Europe will also be required, in order to prosecute patent applications internationally. This is an exciting opportunity to grow and manage your own client portfolio in a firm with a strong reputation for excellence. The environment is both supportive and progressive, and will offer the successful candidate a real opportunity to develop and excel.

An In-house Opportunity, Qualified Patent Attorney, South

Join a global business as Group IP Manager and lead their Intellectual Property team, managing and advising on all IP related matters for the company. This is an extremely strategic and commercial role, where you will be responsible for the protection of the IP originating from the UK arm of the business, as well as being expected to liaise closely with the company's overseas head office in respect to all regional filing and prosecution and the provision of FTO advice for new product and market development. There will also be regular travel to countries including Germany, Japan, Switzerland, Portugal, Brazil, China and the US. You will be expected to effectively coordinate the external network of patent and trade mark attorneys, in addition to leading the internal IP team and support staff and ensuring that relevant departments, such as R&D, business development and marketing are up to date on the latest IP developments.

Adventurous Salaried Partner, Yorkshire

This role would suit attorneys currently at senior associate level seeking a step up or existing salaried Partners hoping for a better shot at achieving equity. Candidates will be able to fit into the ICT/Electronics/Telecommunications team so will have an appropriate technical background. There is a considerable existing workload and clients include global corporations, SMEs and renowned academic institutions.

Attorney, Part Qualified, Engineering, London

This is a fantastic opportunity for a patent attorney early in their career whose present working structure, team dynamic, or client mix isn't quite for them. You will join the firm's successful engineering team, and will work with a number of major multinational corporations while gaining access to a good mix of agency and direct client work. The technical subject matter is also diverse, covering a range of areas across the aerospace, automotive, packaging and petrochemical sectors. You will benefit from an excellent training scheme and a first class support structure during your qualifying examinations, as well as hands on experience and training from day one. Candidates will ideally have around one year's experience in the industry and a strong academic background in mechanical engineering, although other engineering disciplines will be considered. Due to the nature of the role, French language skills would also be beneficial but are by no means fundamental.

Attorney, Newly Qualified, Electronics, London

An ambitious firm at the forefront of the profession are looking to grow their electronics team. You will work alongside one of the most highly respected practitioners within the sector and will benefit from their wealth of experience, including strategic prosecution and oppositions in the UK internationally. The technical mix on offer is varied, and will include but not be limited to communications, optical technology, clean technology, bio-informatics, materials and nanotechnology, and medical devices. This is an excellent opportunity with a clear path to Partnership in a firm that encourages collaboration at all levels. Ideal candidates will be client focused and commercially astute, with a strong academic background in electronics or similar. You will preferably be newly qualified, although those with a little more or less experience will also be considered.

Other positions we're recruiting include:

Part Qualified up to 2 Years' PQE, Engineering, Bristol
Newly Qualified Trade Mark Attorney, South Coast
Finalist Level Patent Attorney, Physics, London
Part Qualified Patent Attorney, Electronics, London
