

**“Innovation
requires
curiosity...**

**and that's
why I've
hired...”**

Trainee Patent Attorney, Electronics/Engineering, London

Gain access to a stimulating portfolio that will often take you beyond the traditional remit. Take control of your own training and enjoy the freedom of this small but forward thinking firm. The client base is extremely international in nature, allowing for overseas travel, and ranges from smaller independent outlets and SMEs to academic institutions and large multinational household names.

Recently Qualified Chemist, South

A new appointment to help tackle an impressive and growing work load has become available at this firm. They hold an extremely high reputation amongst clients and industry peers alike, and pride themselves on their outstanding business acumen and knowledge.

Generalist, Qualified Patent Attorney, Greater London

Fast track your career to Partnership in a collaborative and flexible working environment, and gain exposure to additional responsibilities such as litigation, copyright, design and trade mark work. There is a strong established client base in the UK and US, with the chance to pursue business further afield (or closer to home) if you so wish.

Part Qualified/Finalist, Engineering, London

Enjoy responsibilities not normally awarded to someone at your level and help manage a challenging and truly diverse portfolio of work, ranging from aerospace and defence to road, rail, housing and construction. The earning potential is market leading, as well as there being a modern and spacious working environment.

Newly Qualified Engineer, Manchester

You don't have to be in the capital in order to work with industry leading clients, as this firm clearly demonstrates. Benefit from the support and infrastructure that can only be afforded by one of the largest and most well established teams in the industry, and progress to the next stage of your career quickly whilst being well rewarded.

Salaried Partner, Yorkshire

With a definite full equity track and the potential to grow a practice based on your own interests this firm has a great deal to offer. A technical specialism in electronics, engineering or physics would be ideal but other disciplines could be considered. Whilst a client following would be desirable it is certainly not essential. What is essential however, are sound commercial skills and the ability to network to build new contacts.

Senior Associate, Electronics, Midlands

Gain invaluable managerial and business development experience, with the opportunity to become involved in committees of interest; attend and speak at local and international events; and supervise trainees throughout their qualification and early career. Of course all other duties are included as expected, including strategic and high value work for innovative start-ups, SMEs and household names.

Finalist, Electronics, London

This firm encourages individuals to pursue their own business and isn't afraid of putting attorneys in front of clients from early on. They invest heavily in the ongoing support and training of staff, and ensure that everyone is able to clearly track their development and the steps needed to progress up the ladder.

Qualified Patent Attorney, Mechanical Engineering, Birmingham

Join a firm who has recently had a significant overhaul of their internal working practices and, as a result, be offered a market leading salary and bonus scheme; benefit from cross office collaborative working; and be completely clear on your career progression through a structured and transparent appraisal scheme.

Newly Qualified, Electronics, Birmingham

Escape your pigeonhole and enjoy a vastly diverse work portfolio, spanning across both the electronics and engineering fields. This larger firm has a truly collaborative feel, with cross office teams sharing work originating from direct clients and foreign associates locally and overseas.

Finalist, Biotechnology, London

Manage a strategic portfolio of high value contentious work, including a substantial amount of oppositions before the EPO, as well as plenty of drafting and advisory work for a really interesting and unique client base. The environment is honestly meritocratic and individuals are rewarded often, and rewarded well.

Entry Level Opportunity, Electronics, London

This is an exciting role for someone not necessarily training as a patent attorney currently, but may have completed the Queen Mary and is looking for a foothold in the industry. The firm in question has a family friendly feel, and can offer a bespoke training scheme and access to the full range of duties associated with the profession from day one.

For more information or to apply to any of these roles speak to Pete Fellows or Philippa Holland on 0207 903 5019 or email: contact@fellowsandassociates.com.
