

Trainee Patent Attorney, Electronics, London

Get the best possible support and training in order to develop into a fully rounded and successful patent attorney. There's nothing wrong with making a move early on in your career, and this firm will most definitely help with the transition – with a close knit family feel and a substantial portfolio of international clients to choose from.

Recently Qualified Patent Attorney, Physics, London

It's sometimes difficult to get the variety of work you would like, with work often originating from a single major client. This is far from the case at this firm, who ensure that each attorney has exposure to technologies spanning the entire breadth of their expertise and interest.

Partner Opportunity, Yorkshire

Given the range and mix of existing clients available, this role is both commercial in respect to providing strategic IP advice as well as procedural in terms of original drafting and prosecution. There will be opportunities to be involved in firm management, business development and training, as well as funded overseas trips.

Finalist, Physics, South

Join a firm with a strong reputation and foothold in Europe, and benefit from a dedicated tried and tested training scheme. The firm places a huge investment in the ongoing development of their attorneys, with regular in-house seminars, encouragement to attend CPD events, and close contact with Partners available at every stage of your career.

Recently Qualified Patent Attorney, Physics, North

Manage a portfolio of diverse and interesting local clients, plus wide ranging and dynamic international corporations. Build relationships with SMEs and universities, and help develop and organise their IP strategies through IP capture, drafting, filing and prosecution in the UK and Europe, as well as coordinating a network of associate attorneys internationally.

Part Qualified Patent Attorney, Engineering, London

Become part of an extremely specialised and successful team, and be fully supported throughout your UK and EU qualification. The firm are strong believers in experiential learning and encourage their attorneys to become involved in business development, client contact and the more strategic areas of the business from day one.

Senior Associate, Electronics/Engineering, Midlands

Do you feel overlooked for Partnership? Have you reached a stalemate in your career and no longer feel challenged? This firm can help with that – there's an all but guaranteed track to Partnership within a two year time frame and an established client base of interesting local start-ups and larger multinationals waiting for you.

Newly Qualified Patent Attorney, Biotechnology, London

This firm invests heavily in local industry and is known for their involvement with initiatives supporting start-ups across the biotechnology field. The practice is commercially astute and the firm on the whole is not afraid of making bold decisions to ensure they remain ahead of the competition.

Up to 2 Years' PQE, Electronics, London

Work alongside an incredibly diverse team of IP specialists across a range of offices in the UK and Europe, and provide a truly full service offering to your clients. The firm has particular expertise in the technology, communication and media sectors, and has strong client relations in Europe and Asia.

Qualified Patent Attorney, Chemistry, London

Gain a great deal of responsibility and the opportunity to develop your career in a way that suits your interests. The role will encompass the full range of patent activities, and you will also be encouraged to develop your client skills through business development initiatives and attendance at networking events as well as delivering seminars and joining working groups.

Qualified Patent Attorney, Mechanical Engineering, South

Be instrumental in the development of your clients' IP strategy through IP capture, opinion and advisory work. The existing work originates predominantly from direct clients, allowing for significant client contact, with a degree of agency work enabling you to gain experience liaising with and instructing foreign associates from across the world.

Patent Attorney, Engineering, Manchester

Client satisfaction is at the forefront of this firm's ethos, as is departmental connectedness and the provision of an open and supportive working environment. The firm offers its attorneys a great deal of room for professional development and the opportunity to work on a broad and challenging client portfolio.
