

Finalist, Electronics, London

Complete your qualifications at a firm with an impeccable training record and a fantastic support structure, with access to a wide variety of Partners and fellow fee earners. You will work with an impressive scope of technologies and be encouraged to add to this portfolio to reflect your own strengths and interests.

Finalist Patent Attorney, Chemistry, London

Manage an interesting melting pot of overseas and local clients offering a portfolio of innovative and pioneering technologies. This firm has a culture of giving all their attorneys exposure to clients early on in their career, allowing you to build your own practice from day one.

Qualified Patent Attorney, Chemistry, London

Work across a variety of subject areas, including pharmaceutical, industrial chemistry and chemical engineering, and enjoy an excellent balance of work between original drafting, prosecution and contentious work. You will be encouraged to challenge yourself, with an ever changing mix of responsibilities ensuring you're not just stuck behind your desk completing draft after draft.

Newly Qualified, Physics, London

This firm has a truly international client base, with the opportunity to work closely with clients across the high tech, electrical and engineering fields. There is a fairly relaxed working style with focus placed on the quality of work you produce, as opposed to how long you spend in the office. Secondments to in-house clients are not uncommon and travel to networking events is encouraged.

Senior Associate, Electronics, Midlands

Ready for the next step in your career but feel you are constantly overlooked at your current firm? This firm can all but guarantee Partnership within a very short timeframe, and will ensure your voice and opinion is heard in the meantime. Duties away from the day-to-day prep and pros are encouraged; including participation in industry committees, and organising and hosting IP awareness and educational events.

Various Roles, IP Formalities, Midlands

We're working on some interesting roles for those who have a passion for IP, but don't necessarily want to qualify (or continue working) as a patent attorney. These include a Legal Analyst, Supplier Relationship Manager and Services Solutions Manager. The company in question offers some rather creative perks and are not restricted when it comes to rewarding their employees' commitment and success.

Trainee Patent Attorney, Electronics, Midlands

Benefit from the same level of training, support and client base (not to mention salary) as working in London, but with the perks of a smooth running commute, lower cost of living and the fantastic natural surroundings of the regions. Gain experience in all areas of patent work and have the opportunity to share in supervisory and managerial tasks and decisions from early on.

Qualified Patent Attorney, High Tech, Cambridge

Be part of a highly specialised and experienced team working with cutting edge technologies across the IT, software and wider electronics fields. The growing workload is due both in part to the firm's well established reputation in the industry, as well as their ability to adjust effectively to meet their clients' needs and the ever changing developments in the industry.

Part Qualified Patent Attorney, Electronics/Engineering, London

Drive the direction of your own development with a flexible bespoke structure that allows you to develop at your own pace and have a say in the type of training you receive. The working environment is highly collaborative and close knit, with a family friendly feel and emphasis placed on a healthy work life balance.

Associate, Electronics, North

Career progression is more than achievable at this firm - with clear cut guidelines on what you need to achieve, an impressive and challenging client base allowing you to further develop your skills, and plenty of support from your supervisors and peers along the way.

Qualified Patent Attorney, Engineering, Cambridge

Attend local and overseas networking events, speak at industry functions, and represent the firm in new client affairs at this commercially astute practice. You can tailor your portfolio to be as wide or as narrow as you like, and if there's an area you're particularly interested in - the firm are always open to taking on new clients offering innovative and challenging breakthroughs in technology.

Partner Designate, Electronics or Engineering

We have a number of Partner level positions available across the country, including London, Yorkshire and the Midlands. The firms considering applicants all have demonstrable experience in successfully accommodating senior lateral hires and are in a position to offer a share of the pot within an exceptionally short time frame.

For more information or to apply to any of these roles speak to Pete Fellows or Phillipa Holland on 0207 903 5019 or email: contact@fellowsandassociates.com.
