

Ready to jump in?
We'll help you decide
whether it's really worth it

Trainee Patent Attorney, Electronics, London

Take advantage of a bespoke training scheme and one on one support to help get you through your exams. You will work with a client base that is both eclectic and international in nature, and have the opportunity to take control of your own portfolio from very early on.

Part Qualified Patent Attorney, Engineering, London

Many firms are guilty of describing themselves as forward thinking and different. This firm means it. No, really. They have a very open hiring policy, encourage collaborative working across various technical teams, and adopt a relaxed and informal approach to office life (amongst other things).

Qualified Patent Attorney, Electronics, Manchester

Become involved in small highly specialised cross office technical groups, and work with a range of Partners, fellow fee earners and trainees on a challenging international portfolio of direct client work. There is a defined path to Partnership (which you can complete at your own pace with no pressure from the firm), and they offer a market leading salary and generous bonus scheme.

Newly Qualified, Biotechnology, London

Have the opportunity to do something a little differently at this firm, with endless drafting replaced with complex litigation, opposition and appeal work. The practice is known for its high quality of work and impeccable standard of client satisfaction, and its reputation has attracted an impressive portfolio of innovative and challenging technologies from across the world.

Finalist, Chemistry, London

Tackle an interesting work portfolio with a European twist, and work with industry leaders from a range of backgrounds – including in-house, academia and respected law and boutique IP firms. The team is one of the largest in Europe and boasts a strong patent prosecution department, as well as impressive expertise in EPO opposition work, litigation and SPCs.

Qualified Patent Attorney, Physics, North

Draw inspiration from the local area and work with leading clients offering innovative solutions across the electronics and engineering fields. You will be part of one of the strongest practices in the region, with plenty of backing from a large support team and the opportunity to work in highly specialised and quite unique technical areas.

Trade Mark Partner, London

Step up to a Partner role or move across at a similar level from a competing firm. A client following is not required but a love of training, mentoring and business development is essential. The department itself is highly regarded and has a fantastic range of clients across a wide range of sectors which would suit all tastes.

Finalist Level/Newly Qualified, Engineering, Midlands

Enjoy a very relaxed work life balance, with remote working and flexible hours strongly encouraged. The practice invests heavily in local talent and, as a result, has an impressive client base of pioneering and break-through technologies you may not have the chance to work with at other firms.

Recently Qualified, Electronics, London

Work alongside a diverse team of IP experts known for their unparalleled experience in all things electronics, in particular telecommunications. Not only will you be responsible for the more common day-to-day duties, you will gain exposure to the more commercially charged aspects of IP, for example advising on issues surrounding software and open-source products, and providing input into wider transactional matters.

Patent Attorney Opportunities, Electronics/Engineering, Scotland

Scotland has so much to offer – highly competitive salaries, an interesting and innovative client mix, fantastic scenery and a cosmopolitan feel to rival even the capital. Given the smaller concentration of patent attorneys in the region, there is a real opportunity for advanced career progression and the chance to take control of your own practice from very early on.

Finalist, Life Sciences, London

This firm is experiencing an exciting time of redevelopment and, as a result, could potentially offer you something quite different to most firms in London. You will be responsible for delivering a full service offering to your clients, including developing their IP to maximise value, drafting and prosecution, licensing, strategic counselling, litigation, EPO opposition and regulatory advice.

Senior Associate, Electronics/Engineering, Midlands

Kickstart the next stage of your career with Partnership pretty much all but guaranteed within a very short time frame. You'll have a readymade portfolio of local and international leading clients, as well as an abundance of potential new business available both in the local area and further afield through networking and speaking/attending respected industry events.
