

We'll find you a job.

Victory dance optional.

Engineering, Finalist, Midlands

This independent firm with an excellent local client base is working to extend its operation by appointing a number of new hires. Whilst they have a close connection with large automotive businesses in their region, they also work with some very impressive international companies directly. The work tends to be a mix of complex drafting and prosecution, and you will be encouraged to develop your own client base even while training.

Engineering, Associate, Midlands

Moving positions is sometimes about improving your medium term career opportunities. This firm very much appreciates this and has a timetable that they will discuss with you in respect to achieving the higher levels within the practice (including Partner). This clarity of vision should make them very attractive as you will be given a clear sense of what you need to do to vastly improve your circumstances, particularly if you find career progression limited in your current firm.

In-House, Biotechnology, London

An ideal position for attorneys wishing to move to a corporate environment for the first time as the role will suit attorneys relatively recently qualified or possibly those at finalist level. The company is fast growing and cutting edge, and you will certainly be given the opportunity to work in the areas that can make an in-house position appealing – providing strategic IP advice, being involved in litigation and discussing commercial arrangements.

Biotechnology, Finalist or Newly Qualified, London

Work for a highly regarded boutique firm with a growing biotechnology practice. The environment is radically different to most of the larger firms so would really suit someone who feels they need a change. There is a great deal of flexibility on the work you will be offered but candidates with an interest in the areas of DNA probing and immunology will fit very well.

Chemistry, Qualified (or finalist), London

A role that would likely suit an attorney not massively interested in pharmaceuticals but wanting to deal with all of the other areas a chemist can be involved. Their portfolio touches on chemical engineering, materials, and there is a great deal of oppositions work. The firm has an international profile and is great at attracting large corporate clients.

Engineering or Electronics, Finalist/Qualified, Bristol

One of the highest profile firms in the Bristol region is further developing its electronics and engineering practice. The firm is very open to ideas on background and experience so if you work or wish to work in the South West they would very much encourage an informal chat with them to ascertain if they have a position that would suit.

Biotechnology, Qualified, Cambridge

The Cambridge office for this firm is in a key stage of its development. The firm is keen to attract attorneys who are interested in helping further develop a practice from a very strong base of clients. The practice does have an abundance of work but wants to build more local connections. For attorneys who want a mix of big name clients and a chance to go out and develop a portfolio that builds on their own interests this could represent a great opportunity.

Engineering (or Electronics), Qualified Patent Attorney, Cambridge

This is a very high profile appointment for this firm with significant opportunities for development. Ultimately the firm will need more Partners in Cambridge and therefore wishes to boost its qualified staff with an attorney who will have the abilities to step into a leadership role in the years to come. If you feel your career is stagnating a tad then the firm can offer a great deal plus an excellent work life balance with very reasonable billing targets.

Engineering (or Physics), Part Qualified to 2 Years' PQE

An international IP practice with an excellent portfolio requires an attorney who will ultimately be based in London after a short secondment to Germany. You will gain experience in other jurisdictions and work closely with attorneys from around the world. The firm is keen to develop its attorneys' commercial know-how via a platform of direct client contact and networking opportunities.

Head of Formalities/IP Support

Step in to a newly appointed senior management role with a leading European firm. You will be responsible for leading the formalities function, as well as streamlining the firm's working policies to create a more efficient, client focused, and commercially strong business model. Additional high level responsibilities will become available further down the line as part of the firm's ongoing development plan.

Electronics, Part Qualified, London

We have numerous opportunities in London for attorneys with an electronics background. Training bad where you are? We have you covered. Want more drafting work? Less drafting work? We have that covered too. Oppositions? No Oppositions? Nicer people? Terrible people? Whatever you want we'll have loads of suggestions.

Electronics, Newly Qualified, London

A commercial role for a leading law firm. The work will therefore encompass exposure to patent litigation as well as drafting and prosecution. Clients are varied but the firm has particular experience in software.

For more information or to apply to any of these roles speak to Pete Fellows or Philippa Holland on 0207 903 5019 or email: contact@fellowsandassociates.com.
