

Exit in style

Nearing Qualification, Electronics, Midlands

Sometimes it can be difficult to make the leap and move positions, especially if you're on the cusp of qualifying. Is the career progression really as transparent as they say? Can you really work with all of the clients and benefit from the range of work that they promise? We know from experience that this firm are true to their word and really support their attorneys throughout their careers. So, go on - now is a good as time as any to finally make that leap.

One Year's Experience, Physics, London

Opportunities this early on in your career can be few and far between, but that's no reason not to pay attention when one does come along. This firm understands that there are a number of factors that can cause itchy feet early on, and that none of them reflect on your ability to become a competent patent attorney. This position offers overseas travel, direct clients from across the UK, Europe and the US, as well as excellent training and a dedicated support structure tailored for each trainee.

Part Qualified Patent Attorney, Electronics, London

This firm has a demonstrable track record in successfully welcoming attorneys early on in their career, and is well known for its hands on and tailored approach to its training. They encourage a friendly working environment, with an excellent work life balance and innovative clients originating from the UK, Europe and Asia – in particular Japan. The team is modest in size, however as a consequence they are able to offer additional responsibilities to the norm at such an early stage, such as being involved in firm wide management decisions and networking opportunities.

Nearly/Newly Qualified, Electronics, Yorkshire

Are you struggling to get enough one on one time with your supervising Partner? Feel overlooked for promotion due to the sheer number of fellow fee earners knocking on the same door? Looking for a range of interesting technology to work with, rather than endless drafting for one faceless client? This firm could help with all of that. Their northern team is small but perfectly formed and boasts a range of experience for you to draw from, including physics, computer systems, optics, telecoms and biomedical devices.

Associate, Electronics or Engineering, Midlands

Senior Associate can sometimes be a waiting room where Partnership hopefuls spend years wondering if the next step is truly achievable. There's no risk of that here, with Associates openly progressing straight to senior management positions complete with real responsibility for shaping the future of the firm, its clients and the portfolio of work on offer. Don't worry about stepping on anyone's toes, there's an internal hierarchy gap due to recent promotions throughout the firm meaning you won't be taking anybody else's spot on the list.

Finalist/Newly Qualified, Chemistry, London

If you're looking for a role with the opportunity to travel, work with a diverse and intriguing European client base, and have the option to be seconded overseas – then this is the one for you! Our client is highly regarded in the industry for nurturing and retaining some of the best minds in IP, as well as offering an excellent work life balance, flexible working and a transparent and unpressured career path to Partnership.

Part Qualified Patent Attorney, Biotechnology/Chemistry, London

Join a firm who can offer you a vastly different and inclusive learning environment, where you will work under a variety of Partners with a range of technical and career backgrounds, and be encouraged to become involved with your own clients and work projects from very early on. Ideal candidates will have experience working across both the chemistry and biotechnology fields, although those who have focused on one area more predominantly than the other will also be considered.

Finalist Patent Attorney, Physics, North

They say it's grim up North but we certainly beg to differ, especially with this gem of an opportunity with a leading and widely recognised electronics and engineering specialist. There'll be a huge amount of highly contentious work available, due to the firm working with cutting edge clients developing the latest break throughs in technology, as well as excellent ongoing training and support from cross office teams made up of Partners, fellow fee earners and highly skilled administrative staff.

Senior Associate, Electronics, Midlands

Variety is the spice of life (apparently), and so is the nature of the opportunity at this firm! You will be allowed free rein on building your own portfolio to include technologies that suit your own strengths and interests, even if it's in an area the firm have yet to cover, and become involved in cases as part of a cross office specialist team with the assistance of highly skilled and experienced support staff. You'll also have the chance to supervise and train junior members of staff and represent the firm at leading seminars, conferences and networking events.

Finalist/Newly Qualified Patent Attorney, Biotechnology, London

Work alongside a highly renowned Partner who is building a new team in London. Be part of an ambitious growth project that should lead to very interesting and diverse work and the chance to make your mark. You will be trusted with significant amounts of autonomy and an environment that will allow you to explore more contentious areas of IP, as well as preparation and prosecution. The firm itself are highly progressive, commercially orientated and meritocratic.

Associate, Electronics/Engineering, London

A recent revamp has resulted in this firm being able to offer something drastically different compared to your standard IP practice. They were already a breath of fresh air - however they now benefit from strengthened resources, both across support staff and fee earners in IP and the wider legal sector, and boast a phenomenal international direct client base in the UK, Europe and further afield. You will still have plenty of drafting and prosecution to keep you busy, as well as litigation and developing in depth commercial IP strategy.

Finalist Patent Attorney, Biotechnology, Midlands

Want a highly commercial firm with top notch clients, fantastic salary and a challenging work portfolio, all with the lower cost of living and beautiful scenery of the surrounding countryside? Get in touch! Our client is looking to add to their growing Life Sciences team after a period of ongoing success and can offer the right candidate a mixed bag of hands on work and the opportunity to seek out your own clients, both local to the area and further afield.
