

Current job not fitting the bill?

Trainee with 1 Year's Experience, Physics, London

Is your current role not working out? Not feel like you're getting enough support or access to work that you enjoy/are interested in? How about being pigeon holed with one particular technology? This firm understands the importance of starting and developing your career in a way that suits you, and so offers tailored training and support, a close knit working environment, and a whole host of interesting and international clients for you to get stuck into.

Part Qualified, Engineering/Electronics, London

This firm may not shout as loud as some of its peers but it has been running a quietly confident and successful operation for quite some time now, resulting in steady growth both in terms of staff levels and client base. The offices are in a fantastic location with plenty of options for socialising (which the firm does encourage quite enthusiastically). The management structure allows for input at all levels and there's a distinct lack of red tape when it comes to making Partners.

In-house opportunity, Finalist, Biotechnology, London

Leaders in the field of gene therapeutic technology, Silence Therapeutics, is poised at an exciting time in its growth and is expanding its IP portfolio. As a result, they are able to offer a patent attorney an opportunity that is highly varied and requires plenty of European travel. You will work very closely with R&D departments and enjoy a collaborative environment where you will develop IP strategies in conjunction with scientific staff.

Recently Qualified, Chemistry, Cambridge

Gain access to the Golden Triangle of clients including leading academic institutions, emerging pioneers and established global leaders in the chemical fields. You'll have a say in what direction your portfolio takes, however current industries include pharmaceuticals, fine organic chemicals, polymers, petrochemicals, diagnostic assays, and medical devices. There'll also be the chance to develop your expertise in SPCs and the more strategic and commercially focused elements of IP.

Newly Qualified up to 2 Years' PQE, Software, London

Not your typical patent practice. This full service IP firm will allow you to work with legal specialists from across the IP and accompanying legal community, as well as giving you the chance to gain experience across a wide range of areas including strategy and commercialisation; enforcement with plenty of litigation and dispute resolution; and licensing and agreements. The team are known for their international expertise and have high profile direct clients located across the world.

Part Qualified, Advanced Engineering, Midlands

Work for a firm that possesses the commercial prowess of a law firm but without the endless working hours and billing targets. They aren't afraid to break tradition when it comes to making decisions that further the business and have been known to take risks that have really worked out for them in the long run. Their training is excellent and have fantastic staff pass rate and retention levels.

Trainee Patent Attorney, Chem/Bio Mix, London

This role would suit a patent attorney who is looking to be fully immersed in all aspects of IP, and who is interested in an opportunity to work with a truly mixed bag of technologies across both the chemical and biotechnology fields. You'll be working alongside specialists in IP; technology and media, and be supported by colleagues at all levels throughout your training. Staff members are remunerated extremely well and there is an achievable and generous bonus up for grabs once you qualify.

Senior Associate, Electronics, London

Stuck in a career rut? We're working with a firm who are in need of the next generation of Partner who want to become involved in management level decisions from day one. They have demonstrable experience in taking on senior lateral hires and have no bottle neck when it comes to progressing to the next rung on the ladder. There's a ready-made portfolio of work waiting for you, but they're also open to you pursuing your own interests as part of your practice.

Up to 4 Years' PQE, Telecommunications, Midlands

Join a smaller firm with big plans for their future. Plans that you can be as involved in as much you like, such as the future direction of the business; which new clients and technology areas to go after; which countries to target for new business and conference attendance; and how the firm can spread brand awareness and become involved in industry initiatives.

Partner Designate, Electronics, Midlands

We know that sometimes these types of roles don't exactly deliver what it says on the tin, however that is definitely not the case with this opportunity with a well-established practice in the Midlands. They have a fully formed business plan in place that gives crystal clear guidance on their commitment to making a new Partner and everything you need to know in order to achieve it. There's some great local clients for you to work with, as well as plenty of opportunity to secure overseas business too.

Finalist, Chemistry, London

Travel to Europe with this well-connected firm and deal with complex contentious work and prosecution across a range of fields including pharmaceuticals; oil and gas; biofuels; printing materials; polymers; food, in particular confectionary; and photochemistry. You will also handle SPCs for clients in the UK and Europe, and be looked to for high value opinion and strategy work involving the ongoing and future protection of their IP.

Partner Designate, Engineering, Midlands

Independence is a key component of this firm's philosophy, with each attorney having their own budget to supplement their business interests and encouragement to seek out ways in which awareness of the firm can be amplified, for example through involvement in local and international industry and CPD events. They have a demographic gap which calls for a senior hire to step in and make Partner within a very short time frame.
