

Woof!

## IN THE WRONG JOB?

### Featured Positions

#### **In-House, Chemical/Pharmaceutical, London/Essex** Circa £75,000

This in-house role is all about product development. It will have you visiting R&D sites across Europe and the US, capturing the Intellectual Property generated there. You will pave the way by identifying and dealing with possible obstacles such as 3rd party IP rights. You will manage and support EPO and international oppositions and litigation as necessary. Aside from this, the role's consultative aspect will require you to provide legal advice and raise awareness of IP issues across a variety of business units. There is a preference for a qualified attorney but part-qualified applicants will be considered.

#### **Electronics, Part Qualified or Qualified, London** To £66,000 + benefits

The perfect role for a (tele)communications buff. With this swanky firm you will be exposed to the full range of patent activities and enjoy considerable training and mentoring. The internal post-qualification skills training programme will ensure you are always up to speed, and if you're willing to get involved in business management activities there will be plenty of career progression opportunities. You'll be working with some big names, so client care skills and a strong technical background are key.

### Other Opportunities:

#### **Biotechnology, Qualified (or Finalist), London** To £80,000

Draft and prosecute patent applications for a wide variety of clients ranging from small businesses to multinational organisations. Develop your experience in the provision of client support encompassing preparing and recording assignments, patentability opinions, infringement risk analysis and attending EPO oral proceedings.

#### **Senior Associate, Electronics, London** To £100,000

A role for an experienced qualified patent attorney. With its mix of direct and indirect clients, this practice offers a variety of global work. Expect a fair bit of telecommunications work. The firm is definitely different, with recession-proof growth and a down-to-earth approach.

#### **Electronics, Qualified Patent Attorney (or Finalist), London** £65-75,000

Work on a range of patent specifications in the fields of software, telecommunications and other electronics. Enjoy European and UK work, much of it direct, including a great deal of oppositions and international work (particularly US). Advise clients on filing and prosecution strategies.

#### **Electronics, Qualified Patent Attorney, West Midlands** £Highly Competitive

Draft and prepare patent applications for filing at the UKPO and EPO; prosecution of GB, EP and PCT patent applications; European oppositions and oral proceedings; multijurisdictional patentability research; global corporate clients that are household names.

#### **Mechanical/Automotive, Part Qualified or Qualified, Glasgow**

Wide variety of clients with a large contemporary private practice, which continues to build its success on its high-quality work. Excellent career progression opportunities.

#### **Newly Qualified Patent Attorney, Electro-Mechanical, London** To £65,000

Don't want to do the same thing every day? Then join a firm with a fantastically diverse group of clients: generators, packaging/machinery, software, radar, robotics, flight refuelling and pneumatics. Would suit an engineer with a flair for electronics or an electronics specialist with an aptitude for mechanical.

#### **Electronics Patent Attorney (Qualified), Manchester** £70-£85,000

Join a growing office in Manchester and be part of a new team offering something very different in the region. Enjoy considerable autonomy, a fantastic range of high quality work and be encouraged to build your own practice.

#### **Electronics, Newly/Recently Qualified Patent Attorney, London** To £70,000

Enjoy autonomous management of your own case load. Build your know-how as a Patent Attorney by gaining business development experience attending networking events and other functions. Deal with direct and overseas originating work from global corporations.

#### **In-House Patent Attorney, Telecommunications, Home Counties** £65-£85,000

Help develop the in-house department for this global telecoms company. Work closely with R&D in the UK and across the world and develop knowledge of patent strategy, litigation and IP consultancy. In addition, build on your existing experience with plentiful EPO oppositions work.

#### **Qualified or Finalist Patent Attorney, Scotland**

All technical disciplines will be considered for this expanding office. With a seemingly ever-growing partnership, career progression with this successful firm is highly achievable.
