

Qualified Patent Attorney, Biotechnology, London

A really rather successful Biotechnology department of a prestigious London based firm are in need of an equally fantastic candidate to grow their already burgeoning team. The quality of work is unparalleled with the opportunity to work closely with leading names in the field, in particular in the US, and count them as your clients. You will be extremely academic, yet perspicacious, and will profit from being surrounded by a large elite group of peers where innovation is the daily norm.

Qualified Patent Attorney, Chemistry, London

There is a real flair for entrepreneurialism within the Chemistry department of this firm. However, those who prefer portfolio management and the everyday spectrum of patent duties will also find their niche, with plenty of original drafting, prosecution, opposition and appeal work. There is exposure to a diverse client base, both in the UK and overseas, and career progression is flexible - allowing the Attorney to have a real say in the way their future is mapped out. All with an enviable bonus structure that is both generous and achievable.

Senior Patent Attorney, Mechanical Engineering, Scotland

An exciting opportunity to establish a new office of a leading firm of Patent and Trade Mark Attorneys has arisen in Scotland. You will work closely with a Partner and assist in leading a team of trainees in managing a portfolio of outstanding clients in the field, in addition to actively seeking new tender and expanding the office's fee earning capabilities. Liaise with Board level decision makers and implement their IP strategies across the UK, Europe and worldwide. Become a mentor and advisor to the junior members of the team and witness your role and responsibilities become integral to the future of the firm.

Finalist, Electronics, London

It is time for the next step in your career. Bring the knowledge and experience you have learnt throughout qualification and begin your future in the awe inspiring surroundings of this leading yet affable private practice. The firm displays a deep acuity when it comes to their Attorneys and ensures their progress is supported (and rewarded) well. The full scale of drafting, prosecution and opposition work is available - with business development, advice and IP strategy and more contentious matters also at your fingertips.

Part Qualified Patent Attorney, 1-2 Years' Experience, Chemistry, London

You are relatively new to the profession but this certainly does not mean that you are not in demand. A distinguished private practice based in a highly desirable area of London is recruiting a part qualified Attorney with circa 1-2 years' experience to join their Chemistry department. Your initiation into the firm will be steeped in opportunity, with exposure to the full spectrum of patent duties available from early on. Direct client contact, the chance to attend networking events and a supportive mentoring structure will also all but guarantee your future in the industry.

Qualified Patent Attorney, Mechanical Engineering, Scotland

Provide exceptional service for an existing portfolio of direct clients overseas, as well as receiving and giving instruction via foreign agents. Develop and implement drafting and prosecution strategies both in the UK and Europe, as well as identifying possible areas for innovation. Build the future business of the firm and grow your own practice through sourcing and attending networking opportunities. Partner support will help a successful integration into the firm, as well as highly capable clerical and administrative employees and a bespoke case management system.

Qualified Patent Attorney, Life Sciences, London

Secure your future with this robust firm with a solid reputation in the industry. They have enjoyed booming success throughout the recession and boast a growing work load in both their Chemistry and Biotechnology departments. There is the opportunity to expand upon the normal remit of patent duties with strategic due diligence and advice on regulatory data protection, some litigation and the need to exercise your advisory and advocacy skills on a daily basis, with your decisions impacting on IP programmes worldwide.

Qualified Patent Attorney, Electronics, London

A private practice with an obligation for excellence needs to further develop their Electronics team. The department is in a position to grow at an astonishing rate with an abundance of drafting, prosecution and opposition work, both before the EPO and internationally. Be responsible for more contentious issues, as well as offering up strategic advice, due diligence and tailoring IP plans to maximise their commercial potential. This is not an opportunity for any Patent Attorney, but for those who excel past the average and have the academic credentials to prove it.

Part Qualified Patent Attorney, Electronics, London

A friendly firm with solid credentials needs to grow their Electronics team with the addition of a part qualified Attorney to share in their forever increasing work load. This role marries an enjoyable and welcoming environment with a stellar client base and eclectic mix of technology, perfect for any candidate who is looking for the support needed to fully qualify along with exposure to a fantastic portfolio of work, with the entire gamut of duties available.

Qualified Patent Attorney, Engineering, London

This role allows you to return to the fundamentals of engineering and recapture the essence of why you chose it as your specialism. The firm has a solid reputation for excellence and does not expect anything less from its Attorneys, allowing them access to a superior client base and be surrounded by motivated and likeminded peers. There is an eclectic client base with an international emphasis, in particular Japan, and opportunities to take on more than the everyday - such as strategising and implementing IP plans with a commercial focus.

Part Qualified/Finalist, Engineering, London

Become an IP advocate to start-up companies on the one hand, and a strategic planner and negotiator for international conglomerates on the other. This firm has everything in place in order to make this possible, with an extensive client base offering original drafting and prosecution; opposition and appeals; and all that's in between. The welcoming and supportive atmosphere will appeal to those preparing to qualify and the solid reputation of the firm will all but guarantee a fruitful and successful career to come.

IT Support/Super User Analyst, London

This leading firm is seeking an IT professional ideally with experience working within a professional services environment. You may have experience of case management, billing systems or IP management software and be well versed in Windows and Microsoft Office software. The role will involve working closely with Fee-Earners and resolving issues, perhaps being involved in internal training and developing clever solutions to difficulties. You will have an interest and love for IT but not necessarily any programming ability (although a little bit would go a long way!).

The INTA Annual Meeting 2013

Fellows and Associates are extremely excited to be attending the 135th INTA Annual Meeting in Dallas. It will be a fantastic opportunity for us to catch up with our old contacts made at previous events and meet new professionals from across the industry, and the world.

FellowsTV

Some of you may have seen the new Fellows and Associates Video Roundup available on our dedicated YouTube channel, FellowsTV. We also include videos that pique our interest, whether they are IP focused or simply just good fun! Why not take a look at www.fellowstv.com when you have a few minutes to spare?
