

Think **BIGGER**

## Trade Mark Acquisition

You own a successful Trade Mark Practice. You have a profitable business with turnover in the region of £0.75 - £3 million (although if you're outperforming these figures, please speak to us regardless), your career as a business owner has reached a zenith and its now time to bring your expertise, team and clients to a new home. Get significant financial investment in your business; be part of a highly successful firm that has weathered the recession with aplomb and has continued to grow throughout 2009 and 2010. Flexible arrangements might be offered to suit, this a chance to secure a legacy for all your hard work and ensure that what you have built thrives in the future. Ideas for acquisition include: buyout of current owner; Partnership offered if you join the new business (with fixed term ring fencing of current clients); or in the case of larger operations, a merger of practices.

## Featured Positions

### Patent Attorney, Mechanical Engineering/Materials, London

With a portfolio consisting of medical devices, materials and general mechanical with a splash of biotechnology and chemistry this interesting role would suit an attorney not willing to be categorised to a rigid technical discipline. With two seriously big clients plus a number of smaller companies you will certainly have the opportunity to hone your skills. The work is demanding; ranging from the usual preparation and prosecution, to lots of foreign filing, European oppositions and appeals.

### Patent Attorney, Chemical Engineering, London

This role bucks the trend of economic conditions by being able to offer an abundance of high quality work. In conjunction with an eminent Partner of the practice you will be responsible for a widely varied client portfolio. Build on your experience by developing an all round portfolio of skills from IP consultancy to litigation (including multi opponent oppositions). Gain considerable EPO experience given the nature of the commercial interests of the key clients you will be working with.

## Other Opportunities:

### Qualified Chemist, Patent Attorney, London

A crucial new hire is required for this highly commercial London private practice. You will be keen to work for a firm where your long term career potential can be realised and that you will enjoy the autonomy, variety and flexibility required to achieve your objectives but at the same time be supported by an extremely approachable group of Partners and peers. The Chemistry Department has a contemporary approach and well reasoned business strategy devised by a team who pull together.

### Biotechnology, Qualified London

Join a leading London private practice with a considerable amount of work and plans for expansion. Enjoy a highly diverse range of clients with a portfolio that balances international work with UK direct clients. The firm is commercial, entrepreneurial and offers the promise of career advancement.

### Mechanical, Qualified, London

Friendly, down to earth environment. A culture that encourages hard work but appreciates the importance of a work life balance. Clients include large corporations, SME's and some agency work so there will be plenty of drafting as well as some oppositions and other juicy experience. The firm has a fantastic reputation for looking after its employees and progressing them through the practice.

### Trade Mark Attorney, Qualified, London

Set your own agenda. Create your own role. This opportunity would suit a Trade Mark Attorney tired of being dictated to and seeking a position that allows self definition of one's responsibilities. At the same time, be supported by plenty of cash (both on your salary and investment in infrastructure, such as support for conference attendance), a highly recognised international brand, and a team of people who are leaders in their field. If it's time for a change then ensure you maximise the possibilities.

### In-House, Electronics, Europe/UK

Leading global corporation require a European and/or UK qualified Patent Attorney to be part of their strategic IP team. You will have a technical background in electronics, ideally with a focus on telecommunications and considerable experience of working with the European Patent Office. Ideally you will have international experience and have previously worked in a corporate environment although attorneys from private practice may also be considered.

### Electronics, Qualified, London

A chance to work on an exclusive blue chip telecommunications portfolio and be supported by Partners who are experts in the field. The firm has an endless supply of high quality work and will encourage you to develop as an Attorney with experience as an able Lieutenant and prospects towards Commander in Chief.

### Biotechnology, Qualified, West Midlands

Fantastic, interesting work; highly competitive (with London) remuneration; inclusive office environment; good potential for career progression; and support to develop as an entirely autonomous Patent Attorney. Enjoy oppositions work, original drafting and even some IP consultancy. A chance perhaps to move away from London for a more suburban way of life?

### Electronics, Part Qualified, Bristol

Professional, well regarded firm seeks a part qualified attorney for their important electronics practice. You will have an academic background in electronics, electronic engineering, computing or physics and the potential to progress through the firm once qualified. Perhaps you are seeking a more supportive environment to get you through the last part of your training or maybe you would like to be given more autonomy to deal with clients directly and learn through high quality experience?
