

*“Success means having the courage,
the determination, and the will
to become the person you
believe you were
meant to be”*

George Sheehan

Patent Attorney (Chemistry)

Mathys & Squire's Life Sciences and Chemistry practice has developed an industry leading reputation in the last few years which has made a significant contribution to the growth of the firm. Working as a **Technical Assistant/Patent Attorney (Chemistry)** with major UK and global pharmaceutical companies, you will need to use your strategic, advisory and advocacy skills to support the development and implementation of high value intellectual property programmes around the world.

The opportunity will interest candidates who are seeking exposure to a challenging portfolio of prosecution, opposition and litigation cases, as well as strategic due diligence and advice on regulatory data protection.

The firm encourages its technical assistants and attorneys to develop independence in their working relationships with clients, but nevertheless maintains a network of support that is available when required, including both partner level mentoring and regular peer group meetings. There is also a visible career development framework to enable the best people to succeed in their aspirations.

Given the continuing growth in the practice's client base, there are at least two positions available, in respect of which the firm is seeking candidates with a pharmaceutical background and at least three years' experience in the profession.

To apply please call Pete Fellows or Phillipa Field of Fellows and Associates on: **+44 20 7903 5019** or email: contact@fellowsandassociates.com
