

You can't accuse us of being lemmings

(Because we're hamsters)

Featured Positions:

Qualified Electronics, London

A sense of adventure is a must with this role within a leading European legal firm as a Qualified Electronics Patent Attorney. While based in their London office you will have a chance to taste continental Europe with travel to their Munich office once a month. The firm want a capable and business minded candidate to join their team and be integral to the growth of their European outfit. This isn't to say that your technical expertise will be overlooked - with existing work from large corporations you will have direct exposure to clients and a workload that includes a considerable volume of original drafting.

Trademark Attorney, Manchester

As a Trademark Attorney this firm offers you an excellent chance to join a large reputable firm with offices across the UK. Based in Manchester, you will be able to benefit from high class clients and a varied mix of responsibilities, with possible exposure to litigation and more contentious elements of work. This is a fantastic role that delivers a defined (and somewhat guaranteed) career path, superb remuneration and the chance to work for a firm with proven strength and success in the IP sector. If a move to the North is something you would consider, then don't let this fantastic opportunity pass you by.

Other Opportunities:

Part Qualified Electronics, London

Work within a well-respected firm with an international reputation and globally recognised clients. The firm operate on a meritocratic basis, so your hard work and diligence will always be recognised. With this in mind there is a clear pathway for career progression with a varied bag of work to keep you busy whilst you work your way up the ladder.

Qualified Electronics, South West

With an ever-growing Bristol office this firm is looking to add to their busy team with the addition of a new attorney. You won't be in a regional outpost; the firm heavily invests into every one of their offices and ensures that their staff members are able to reach their full potential. A large amount of the role will involve directly dealing with clients and prosecutions.

Qualified Mechanical Engineer, London

Become an integral part of this private practice's future and use your passion and enthusiasm to build the firm's business as well as your own. They are offering a fantastic opportunity to work within a successful team as well as benefiting from the autonomy needed to spread your own wings. There is a lot of room for career progression and the ability to work directly with high class and high quality clients, with plenty of drafting, prosecution and opposition work available.

Qualified Biotechnology, South

A newly created role for a Qualified Patent Attorney in biotechnology. Our client wishes to add to their science team after a successful few years. The firm offers a lot of access to direct clients and a broad range of responsibilities, including drafting, oppositions and more contentious prosecution work.

Part Qualified Mechanical Engineer, London

If you have a love of technical detail and the real 'nitty gritty' of engineering, then this firm will offer just that, along with the opportunity to work with like-minded individuals. They are looking for candidates with a real passion for automotive and want to be an integral part of their metaphorical machine. That isn't to say you'll be a droid, in fact your individual opinion will be listened to and valued.

Part Qualified Electronics and Telecommunications, London

Our client is rapidly expanding their operation and would welcome your knowledge and expertise wholeheartedly. The successful candidate will have an eye for detail and exceptional technical knowledge. The firm offers direct client contact from the off and a support structure that will enable you to develop as a rounded and experienced professional.

Qualified Physics, Yorkshire

Get out of the city and enjoy the fresh air of the Peaks with this role. As a physics specialist our client wants to include you in the daily growth of their business whilst utilising your specific knowledge and specialism. The right candidate will be creative and a forward thinker with an ability to generate business leads, although a large portfolio of established clients means you will never tire of existing direct client work.

Qualified Physics/Material Scientist, Kent

If you're longing for an equal balance between work and home life with all the trimmings of world class clients and high quality work then this is the role for you. This well respected private practice firm are able to offer a Qualified Physics or Material Scientist a broad range of work. From original drafting to more contentious issues you will have an opportunity to work directly with clients and develop your own practice in the process.

Part Qualified Electronics, Physics or Telecommunications, Midlands

Join a thriving private practice firm in the heart of the England as an electronics specialist. This firm are one of the UK's largest private practices and have ridden out the recession with ease. They are in a fantastic position to support your career growth and reward accordingly.

International vacancies

With the winter nights drawing ever closer, it's not hard to wish you were in sunnier climes and we can help! Due to our recent successful trip to South Korea for the 43rd AIPPI World Intellectual Property Congress, we are now actively recruiting for an increased number of international vacancies. If a move to continental Europe, South Africa, Asia or Australia is of interest then we have positions in all technical disciplines available. Make the leap today!

For more information or to apply to any of these roles speak to Pete Fellows or Phillipa Field on 020 7903 5019 or email: contact@fellowsandassociates.com.
