Featured Positions:

Part Qualified/ Finalist, Electronics & Telecommunications

This London private practice's training programme has a proven record of successful results and is highly regarded in the profession as whole. In addition, there is significant opportunity for early exposure to oppositions, drafting and filing for European and international clients. They hope to create well rounded patent attorneys and are looking for someone with an interest in the commercial side of intellectual property as well as preparation and prosecution. The firm has a second to none office environment and has invested heavily in its infrastructure.

In-house Qualified Chemical Engineering or Electronic Engineering

Work for a leading international corporation as a Patent Attorney and IP Counsel. Develop and promote IP strategy across the group and be part of international litigation efforts. Defend the company via EPO oppositions and manage offensive and defensive approaches to the company's IP. Also, enjoy a good volume of original drafting work and coordinate external attorneys worldwide. Ideally the role would suit an attorney who is between 1 and 4 years post qualified although candidates with less/more experience will be considered with an appropriate technical background.

Other Opportunities:

Qualified, Biotechnology, London

Enjoy the merits of high class work with some of the world's largest biotechnology companies as clients. This role will give the right candidate a chance to engage in direct client work with international clients. There is also enough drafting, filing and opposition work to sink your teeth into. Be part of one of the largest and arguably one of the best biotechnology practices in the UK and work with a Partner with an international standing. A career empowering job, not just improving your prospects but defining your career in a new way.

Part Qualified Electronics, London

This London firm hope to find an electronics specialist to join their team. They have an international reputation and you will benefit from an ample variety of clients that you will work directly with. With a focus on semiconductors, telecommunications and software the position will suit an attorney who enjoys a mixed bag of technology as part of their day-to-day.

Materials Science Specialist, Qualified

A broad role that would suit a patent all-rounder, our client is seeking an Attorney with background in physics or materials, although chemistry may be considered. There will be a large amount of original drafting and direct client work and the technical focus is broad, ranging from semiconductors to nanostructures as well as some chemical-mechanical work. There is some flexibility as to how the firm arranges the department so if you are better at some aspects than others, from a technical perspective, then that can certainly be accommodated.

Qualified Electronics, Patent Attorney, London

Work with some of the largest telecommunications companies in the world, directly, without agency intervention. Develop a commercial IP strategy in partnership with your clients. Be highly involved in contentious work including numerous European oppositions. Help more junior staff through active support and training.

Practice Acquisition – Sell Your Firm!

We are keen to speak to small practice owners looking for a home for their existing business. At the moment we are particularly interested in speaking to practices with a significant trade mark and/or electronics practice. We can help you put your firm in a sellable position and provide free advice from a qualified management accountant.

Qualified Engineering Patent Attorney, W. Yorkshire

A boutique West Yorkshire firm of patent attorneys are seeking an experienced general engineer to join their team. There will be an opportunity to experience a substantial amount of direct client work and original drafting. The opportunity represents a great deal of career potential as it is anticipated that the office will increase in size significantly in coming years. The client base is rather diverse but includes large international corporations and hence being able to work with senior decision makers controlling substantial IP budgets is essential.

Qualified Electronics/Telecommunications/Software, London

This leading law firm are adding to their patent prosecution team and need a newly qualified Patent Attorney to join them. This is a job for an attorney looking for a slightly different emphasis and exposure to the whole gamut of intellectual property issues, including litigation, as well as being part of a global team of legal professionals.

Qualified Trade Mark Attorney, London

This role requires someone with a love of building new relationships and generating business leads. This is a Trade Mark Attorney position but with real commercial emphasis. INTA, MARQUES, you name it, this firm want you there. This is a great opportunity for a tenacious individual with a plan to shape their own career. Benefit from a meritocratic environment where good ideas and hard work are recognised. The international connections and reputation this firm boasts will be an ample foundation for you to build your practice on.

Qualified/Finalist, Patent Attorney, Pharmaceuticals, London

This practice is headed up by an internationally renowned Partner and as a consequence deals with industry leaders internationally. They have a terrific mix of work and should be able to accommodate most tastes. There is a balanced portfolio of drafting and prosecution as well as a good proportion of oppositions, infringement and validity and oral proceedings.

Part Qualified, Automotive, Engineer

Work with a highly experienced Patent Attorney on an interesting, diverse and sizeable client base. Be hands on very early in your career, gaining ample experience of drafting, prosecution and contentious work. Be left to deal with clients directly and build a relationship of your own.
