

Winning is everything

Featured Positions

Commercial Patent Attorney (In-House), Berkshire

Leading international technology company requires a Patent Attorney with a technical background in electronics, electrical engineering or computing/software for a position based in Berkshire. The role is highly strategic in nature and hence you will be capable of making quick yet thorough commercial decisions in relation to the IP portfolio. Responsibilities are broad incorporating not only drafting, preparation, prosecution, oppositions, etc. but also litigation, licensing, infringement actions and a broad array of unanticipated issues that arise as a function of a high profile role within a busy global IP department.

Electronics/Physics, Qualified Patent Attorney, Bristol

This is a wonderful opportunity to further develop your career. The firm encourages teamwork whilst rewarding individual success. The position would suit a potential future Partner with the desire to develop their skill base and help drive their practice. You will thrive in an organism that thinks and behaves commercially and offers something different to the intellectual property market. You will be a keen networker and will take advantage of the many opportunities offered to you by the firm to quickly develop and grow your client base.

Other Opportunities

Electronics Patent Attorney, South Midlands

This important role for a Midlands powerhouse private practice requires an Attorney with tenacity, grit, determination and flair. You will be keen to work in a firm where your long term career potential can be realised and that you will have the autonomy, variety and flexibility required to achieve your objectives. The firm has an enterprising and contemporary vision and well considered business strategy devised by a Partnership who pulls together for the empowerment of the practice.

Electronics, Associate, Partner Designate, London

This private practice has demonstrated impressive resilience over the recent years of economic difficulty. No redundancies, no shortage of work just steady (and sometimes rapid) growth. They require a new Associate for their Electronics team to build on recent client acquisition successes. There is some flexibility as to your technical background as work can be moved between existing staff to accommodate.

Strategic Patent Attorney, South Wales

The firm has a highly innovate quality orientated approach. They have been incredibly successful and require an Attorney to aid their growth further via national expansion. This is a terrific role for an individual who is happy to work for a successful brand but requires the autonomy and flexibility of a smaller office. The firm is in the process of expanding its Partnership so opportunities for career enhancement are excellent.

Leadership Potential, Electronics/Mechanical, Midlands

Create and build your portfolio with support from this highly reputable firm. Take control of the Midlands practice by demonstrating leadership and a keen eye for new business opportunities. This is a superb chance to make your mark, develop your own client base and make it all the way to the top. Benefit from having a real influence on how this office develops and in the longer term the identity of the firm in its entirety.

Part Qualified Patent Attorney, Organic Chemistry, Yorkshire

A real chance to build a career by focussing not only on the short term but also what happens when you qualify. This firm will help you build a professional identity through early client contact, exposure to the whole range of skills required of a Patent Attorney and having your best interests in mind in respect to your future.

Marketer, Impresario, Part or Newly Qualified Patent Attorney, Glasgow

Chemistry...but so much more. The Glasgow office for this private practice is growing alarmingly quickly. They require an Attorney who has the potential to be a master of exploiting commercial opportunity (as well as drafting and prosecuting patents).

Electronics, Part Qualified, Bristol

Are you seeking a more supportive environment to get you through the last part of your training or maybe you would like to be given more autonomy to deal with clients directly and learn through high quality experience? You would certainly like to know where you are heading and be attracted to a position with clear objectives to achieve fair progression.

Finalist, Electronics Patent Attorney, London

Diverse range of clients. Training support. Culture of achievement. This private practice works with many high profile brands and key technologies both within the UK and internationally. Attorneys will be offered well balanced diversity in their work portfolio with a mix of drafting, oppositions and prosecution. Post qualification, future potential is fantastic.
