

# Trapped?

## Featured Positions:

### European Qualified, Patent Attorney, Europe

Reached a stale mate in the UK? Relocate to Europe and take your career to the next level with one of the largest and most prestigious law firms in the world, with exclusive focus on the IP sector. Be an integral part of their strategic growth across Europe, use and build upon your business development skills and enjoy an autonomous role where you guide your own business and responsibilities, to an extent. Enjoy the collegiality that is not often found in large law firms and benefit from the value that will be invested in you.

### Qualified, Electronics Patent Attorney Helpline, London

Too many associates at your current firm? Limited chance of definite career progression? Absence of direct client work? Never been near an opposition? Dreaming of hi-tech, cutting edge electronics and software work? Wish Partners would actually listen to you on occasion? Hoping for a more social environment where you're surrounded not only by peers but friends? If you need help with any of these problems, perhaps we can help. Call the number below.

## Other Opportunities:

### Qualified, Electronics, London

Qualified? Check. Electronics? Check. Highly sought after? You bet! One of the largest private practices in the UK is looking to add to their growing team of electronics specialists and, to be quite honest, you'd be mad not to apply. The firm is meritocratic and fiercely modern in its approach to the industry, appealing to those wanting to jump out of the shadows and make a difference in their career. The firm also boasts one of the best bonus structures in the industry so, as mentioned above, you'd be mad not to apply!

### Newly Qualified, Trade Mark Attorney, London

Ever wanted to work amongst a highly experienced peer group of Trade Mark Attorneys with an excellent, diverse mix of clients? Well now is your chance to utilise your knowledge gained in training and create a real impression and career footprint with this fantastic opportunity! Work directly with many household names and become directly involved in the future of the business, with networking and business development a given. The practice is currently lacking in newly qualified professionals and consists of mostly senior associates and trainees, meaning that the possibility of career advancement is all but guaranteed.

### Partner / Partner Designate, Yorkshire

Patent Attorney (any discipline) with either a portable client list or at least an excellent contact base could find a new home with an immediate prospect of partnership (potentially including equity). The firm is growing and is highly ambitious for its future. This position represents a fantastic opportunity for existing Associates who wish to take a next step up the ladder towards firm ownership or for Partners that are feeling underappreciated by their current practices.

### Part Qualified Chemist, Patent Attorney, London

Positions for Patent Attorneys with a chemistry background have been fairly scarce of late. Don't miss out on this chance to join a leading firm with an exemplary training record, some very high profile Partners and a meritocratic reward structure. You will fill a gap between brand new trainees and qualified associates, ensuring space for your ambitions to be realised.

### Qualified Mechanical Engineer, Associate/Senior Associate, London

With a good mix of international and UK based direct client work as well as an increasing interest in litigation, this firm has a great offering for an attorney looking for something just a bit different. The role would suit a qualified mechanical engineer who is perhaps frustrated by the lack of palatable longer term options where they currently are and are hoping for an environment that would promote their ideas.

### Practice Acquisition – Sell Your Firm!

We are working with a leading London based private practice with expansion plans via acquisition. The ideal target would be a small to medium firm (with perhaps 1-2 Partners and c. 3-5 Fee Earners) who are perhaps facing a succession issue or the founders simply wish to hand over their practice over time, leaving their employees in safe hands. Ideally you will have a trade mark practice or a trade mark and patent practice but all reasonable ideas will be considered. The current location of your practice is not necessarily an issue. The firm will make every effort to arrange for a fair but commercial valuation of your practice.

### Newly Qualified, Electronics, London

Join a firm that is looking to nurture the talent gained during training and develop it into an outstanding career. Benefit from direct client contact and encouraged independence from the outset, but with the supervision and on-going training needed to become a successful Patent Attorney. Forge relationships with colleagues and clients alike that will help grow your skills into a practice of your own with the business development and networking that follows.

### Qualified, Trade Mark Attorney, London

A private practice is seeking a fresh approach to their business development and requires someone to inject new life into their strategies and ways of thinking. Immerse yourself in work that reflects both the traditional and modern times with established, loyal clients lining up next to the new and exciting. Enjoy a flexible balance between the personal and professional with work facilities in place enviable to the most tech savvy. Be the next generation with a real steer on the future course of the firm, with Partnership a real possibility.

### Patent Attorney (newly qualified), Mechanical, Yorkshire

Enjoy a highly varied portfolio of clients with a substantial direct client base. Be involved in business development and be a resource for strategic advice to clients. With substantial opportunities within the firm for significant career progression over time as well as control over what you will ultimately be responsible for – this really is quite different from the norm.

### Finalist, Engineering, London

See out your training in one of the most efficient and professionally run firms in the UK and guarantee a path heading towards success. Enjoy the meritocratic culture of modern times and a bonus scheme enviable to most across the industry. Don't be misled by false promises of career progression, this firm is honest and rewards those who deserve. The client base is exciting, so exciting in fact that their anonymity is fiercely guarded and the only way to find out is to work there, so what are you waiting for?

### General Engineering (newly/recently), Qualified Patent Attorney, London

Not quite a boutique firm but perhaps a boutique department, the recruitment of this position plays a key strategic role in the development of the firm. It therefore allows for greater autonomy than perhaps you're used to and the rewards are potentially fantastic if you are prepared to contribute substantially. The firm is well known and have a great reputation (particularly for oppositions work) so you will be in a welcoming environment that allows you to flourish.
