## Featured Positions

### IP Systems Analyst, West Midlands

Development, design and assimilation of IP Management Software for a leading firm of Patent Attorneys. The role would suit someone with a technical IT background and experience of Transact-SQL. Ideally, you will currently be working within an IT role for a firm of Patent Attorneys, however candidates with a background in case management software (legal, accountancy, other professional services) will be highly regarded. In this high profile role you will work closely with senior staff within the firm and coordinate a wide variety of systems projects.

### Electronics Patent Attorney, Qualified, London

Opportunities abound for electronics patent attorneys, but this is a particularly juicy one. The firm is renowned for its high quality attorneys and partners, but has a refreshing outlook on how this quality might be achieved (and it's certainly not by slaving away in the office at all hours of the night). Exciting career prospects as well as instant gratification in terms of salary and work environment – this job has it all.

## Other Opportunities:

### Trade Mark Attorney, Qualified or Near-Qualified, London or Manchester

This fantastic, growing international firm with locations around the UK is looking to expand, and will give you the choice of joining the office in London or Manchester for an exciting role with lots of business development responsibilities. If you love working in an international environment, this forward-thinking private practice is for you. You will preferably be UK qualified and have some experience in oppositions.

### Engineering, Qualified Patent Attorney, Bristol

This preeminent firm with offices all over the UK will provide you with ample engineering work, fantastic career prospects, and a supportive work environment. The ideal candidate will have a UK or EU Patent Attorney Qualification, at least a 2:1 degree in Mechanical or Electronic Engineering from a good university, and a taste for business development.

### Engineering, Qualified Patent Attorney, Midlands

Bring out the best in your career by joining this very prominent private practice in their Midlands office. Due to an increased workload they are looking for true mechanical engineers to match their truly engineering-based clients. The firm is very meritocratic, and generously rewards high quality performance, own initiative, and business development activities, not only with bonuses but also future perspective. Needless to say career prospects are excellent.

### Biotechnology, Qualified Patent Attorney, London

Biotech buffs behold! This excellent firm in central London is looking for an equally excellent attorney to join their ranks. Challenging work, a diverse client portfolio, and an outstanding support structure. Don't be left behind! Progress your career by joining this modern private practice – you won't regret it.

### Electronics Patent Attorney, Qualified, Manchester

Well-respected firm with a superb work environment located in central Manchester. Would suit a qualified attorney who likes to hit the ground running, enjoys working on business development, and has leadership potential. Reap the benefits of this firm's great clients, support staff, and partners while developing your career!

### Adventurous Patent Attorney, PQ, Electronics, Yorkshire

Challenge yourself in the distant north (unless you're already there, then it's down the road). This opportunity offers the chance to work along an established team in a rapidly expanding office being at the northern most frontier of their operation. You will be at the coal face so will have a great deal of exposure to client development as well as developing your abilities by learning from some of the best in the profession.

### Electronics, Partner Designate/Partner, London

Take over an existing portfolio of work across a broad range of clients (a large proportion of which are direct) and technical variety (software, telecoms, imaging, video processing). This is an opportunity for an Attorney seeking a challenging technical experience with career building potential. The firm is very genuine in offering clear progression for this role including full Equity Partnership in the future.

### Chemist, Qualified Patent Attorney, Yorkshire

This firm's rapidly growing chemistry practice requires additional support for their team. The role would suit an attorney with a love of chemistry but wishing for a broad range of technical work from pharmaceutical to petrochemical. You will be encouraged to develop your commercial abilities, provide training to those that need it and ultimately build a client portfolio of your own on your way to potential partnership.

### Electronics, Partner Designate, Yorkshire

Huge amount of high quality work, ready to take over client list, high profile role within the firm, excellent career progression potential and support to develop your commercial and strategic expertise. Clients are mix of global corporations, SME's and Universities.

### Attorney, Part Qualified, Electronics, London

Trendy firm of Patent Attorneys with a very distinctive sense of business style need a quirky independent thinker to complement an eclectic mix within their electronics department. They take training seriously but can also offer a great deal of early responsibility and exposure to some varied, amusing work.
