

**Part Qualified Patent Attorney,  
Electronics/Physics, London**

A broad range of complex electronics work (particularly telecommunications wireless radio technology) will welcome you to this firm. They have been expanding their department in recent years and offer a focused mentoring culture in conjunction with a sizeable peer group to learn with and from. They can give you experience across the whole gamut of patent attorney concerns, from drafting to oppositions and licensing.

**Qualified Patent Attorney,  
Electronics, London**

Achieving career progression beyond Associate is becoming increasingly difficult for many attorneys as a product of the economic downturn. Firms' profits have reduced and many existing Equity Partners are reluctant to further dilute the pot. It doesn't have to be that way, some firms are still making lots of money and have the budget and the interest to grow at all levels. If you are concerned about the future, this firm can give you options that might seem impossible with your current employer.

**In-House Patent Attorney,  
Chemistry, Home Counties**

A rare in-house opportunity for a European and UK qualified Patent Attorney with a pharmaceutical chemistry background. The role will best suit an attorney with a breadth of experience across drafting, prosecution and contentious work and, as a result, both a private practice and industry background will be considered. The company handles a high volume of oppositions work so if you wish to gain more exposure to complex legal issues then this role may be ideal. The company offers a highly competitive salary, a generous bonus (15-20%) and pension scheme.

**Part Qualified Patent Attorney,  
Electronics, Midlands**

Savvy, highly commercial firm with a tremendous collection of clients need to expand their local operation by taking in more part qualified attorneys. Their training regime is superb exhibited by encouraging active early involvement with clients, allowing you to gain a wide range of technical experience and being supported ably by your peers. The workload will be varied including small, medium enterprises, and large, internationally renowned corporations.

**Senior Associate, Mechanical  
Engineering, London**

Assert your business development skills in this forward thinking and modern private practice. Mould your career to suit you and use years of experience to benefit both yourself and the firm. Although commercially minded candidates are desired, there is also an established (and exciting!) client base waiting for you to take the charge. This firm is purposefully run, and run well, with a bonus scheme in place enviable to most in the industry.

**Qualified, Pharmaceuticals, London**

Tenacious and driven Chemist needed for a large private practice with a solid reputation. This role will have you implementing strategies and advising clients from day one, along with the daily grind of original drafting, prosecution and opposition work. The firm is growing at an astounding rate and there is an urgent need for the next generation of Partner to step forward and set the foundations ready to lead their Chemistry department in the future.

**Qualified, Biotechnology, London**

Take responsibility for some of the largest Biotechnology companies in the world and be integral to their future IP plans. This firm is sourcing a Qualified Patent Attorney with a background in Biotechnology to share in their heavy workload. The ideal candidate will be looked for advice on regulatory data protection and be responsible for strategic due diligence, as well as balancing a diverse portfolio of prosecution, opposition and litigation cases.

**Newly Qualified, Trade Mark Attorney, Yorkshire**

Work for a highly successful Trade Mark department of this private practice with a truly excellent set of clients. Gain more exposure to contentious work and be encouraged to develop your own methodologies whilst being ably supported by your colleagues. Manage your own portfolio and advise on the selection and registration of marks in the UK and further afield, in addition to licensing and design matters. Become a problem solver and an active member of the Trade Mark department and be regularly called upon for your involvement.

**Part Qualified Patent Attorney, Electronics, South West**

Gain the experience one might expect from a typical London private practice coupled with the joys of being based in the South West. The firm's clients are highly diverse in both size and scope of their intellectual property interests. The firm has some highly experienced attorneys who will demonstrate their keen interest in building your knowledge and in turn increasing the range of opportunity for your future with the practice. If learning from strong mentors is important plus being given the opportunity and responsibility to act on your own then this position will have a great deal to offer you.

**European Patent Attorney, Mechanical Engineering or Electronics, Noréns – Stockholm**

Take the leap and grasp this excellent opportunity to move to a vibrant and eclectic city. Gain responsibility for a number of client portfolios and assume significant drafting and prosecution work. You will be dealing directly with R&D, CEOs and business owners, across a range of sectors and businesses, and be looked to for strategic advice and planning. Business development skills are crucial, as is the ability to move across discipline borders with ease (excluding chemistry and life sciences). A second business language is highly desirable.

**Part/Fully Qualified, Chemistry, Spruson & Ferguson - Singapore**

Reputable firm Spruson & Ferguson is developing their Chemistry team in Singapore to tackle their currently burgeoning workload. You will manage client portfolios from across a wide range of technologies and industries, as well as benefiting from regular contact with domestic, regional and internationally based clients. The ideal candidate will have a background in organic chemistry but the firm's flexibility will allow for general chemists to also be considered.

**Qualified, Electronics**  
Join a quaint private practice and settle into a modest career where hard work and determination, as opposed to showmanship, is noted and rewarded. Enjoy a varied work portfolio and regular opportunities to meet and advise reputable clients directly. The firm needs candidates who can assert their skillset from day one and implement strategies that will benefit both their clients and the firm. There is a friendly atmosphere in place, where you can really concentrate on what it is important – the work.

**Part Qualified, Electronics, London**

Electronics candidates are very much pioneers of their own careers at present, with a vast amount of options available to them. So, where better to carve out your future than in a firm that is fiercely modern and charging ahead of the times. Gain significant exposure to original drafting, prosecution and opposition work, plus more detailed contentious and litigation cases. Savour the meritocratic environment and watch your success and determination be met with considerable reward.

**Part Qualified, Life Sciences, Mathys & Squire – London**

Following on from growing success throughout the recession, Mathys & Squire is hiring Patent Attorneys of varying levels of qualification for both their Pharmaceutical and Biotechnology departments. The training, coupled with Partner level mentoring and peer group meetings, will supply the ideal candidate will all that is needed to become fully qualified – as well as enjoying exposure to a challenging portfolio of prosecution, opposition and litigation cases along the way.

**Qualified, Life Sciences, Mathys & Squire – London**

The need has arisen at Mathys & Squire for a Patent Attorney who is able to deliver strategic due diligence and advice on regulatory data protection, in addition to completing the necessary drafting, prosecution and opposition and litigation work. This is more than a desk job: you will be point of contact for global Pharmaceutical and Biotechnology companies and support the development and implementation of high value intellectual property programmes from around the world.

**Patent Engineer, Telecommunications, London**

A unique opportunity has arrived for an Engineer hoping to enter into the patent profession. A boutique firm requires a candidate with knowledge of mapping patents to standards technology to join their forward thinking outfit. Exploit your niche knowledge in conducting validity searches and assist in applications. Prior exposure to IP is by no means required, but a drive to learn and be challenged is a must.

**Part/Fully Qualified, Mechanical Engineering, Various Locations across the UK**

This opening has far reaching prospects with the firm looking to add to their Engineering department in four locations across the UK. The current workload has coerced this modern firm to grow significantly, indicating potential career opportunities in the future for those who join. The meritocratic environment will help you on your way to success, with a detailed and highly technical client portfolio to keep you busy along the way.

**Qualified, Trade Mark Attorney, Yorkshire**

An established practice, with an enviable list of corporate clients with highly recognisable brands, is seeking an attorney who will be immediately productive and who would benefit from a great deal of autonomy from day one. The ideal candidate will handle significant contentious work, as well as advising on the selection and registration of marks globally (and in the UK) and deal with licensing and design matters. Business development is not essential, but the firm will support any marketing efforts you wish to pursue - such as travel to INTA, ECTA or MARQUES.

**Part Qualified/Finalist, Electronics**

Put the steps in place in order to secure a thriving career with this move to a large yet considerate private practice. The training and support structure will guarantee any candidate an enviable start to the next stage of their career, with regular Partner level mentoring and peer group meetings in place. Adapt the knowledge you have already gained to a diverse and detailed range of work, including significant direct client contact with reputable companies with global presence.

**European Patent Attorney, Physics/Electronics, London**

This new and exciting position would suit an attorney who is looking for a role that presents more opportunities for client interaction; more chance of having autonomy and client control; being part of an ambitious special project and who can't face the prospect of moving to another private practice similar to their own and really wants something dramatically different. In the long term, this job will develop based on your own interests and own commitment to it. Sound interesting? Then apply!

**Part Qualified, Trade Mark Attorney, Yorkshire**

Act on behalf of highly reputable and diverse brands and begin your career as a fully rounded, commercially minded Trade Mark Attorney. This firm invest a significant amount of time and effort in supporting their staff and encourage autonomy and involvement in marketing activities and conferences in the longer term. Existing experience of advising on the selection and registration of trade marks, conducting assignments and portfolio management is most certainly desirable, but not an essential requirement.
